1 Attributable to the shareholders of Barry Callebaut AG.

# **Basis of Preparation**

#### A. Organization and business activity

Barry Callebaut AG (the "Company") has its head office in Zurich, Switzerland, at Hardturmstrasse 181. Barry Callebaut AG is registered in Switzerland and has been listed on the SIX Swiss Exchange (BARN, ISIN Number: CH0009002962) since 1998. These Consolidated Financial Statements comprise the Company and its subsidiaries (together referred to as the "Group").

The Group is the world's leading manufacturer of high-quality chocolate and cocoa products – from sourcing and processing cocoa beans to producing the finest chocolates, including chocolate fillings, decorations, and compounds.

#### **B.** Basis of presentation

The Consolidated Financial Statements were authorized for issue by the Board of Directors on November 8, 2021 and are subject to approval by the Annual General Meeting of Shareholders on December 8, 2021.

The Consolidated Financial Statements of the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) and comply with Swiss law.

The Consolidated Financial Statements have been prepared on the historical cost basis except for certain items for which IFRS requires another measurement basis, in which case this is explicitly stated in the accounting policies. Significant accounting policies relevant to the understanding of the Consolidated Financial Statements are included in the corresponding notes. The Group has consistently applied its accounting policies to all periods presented in these Consolidated Financial Statements.

The Consolidated Financial Statements are presented in Swiss francs, which is the Company's functional currency.

All amounts have been rounded to the nearest thousand, unless otherwise indicated. Due to rounding, the figures presented in the tables may not add up precisely to the totals provided.

#### C. Use of judgment and estimates

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively.

Information related to judgments made in applying accounting policies that have the most significant effects on the amounts recognized in the Consolidated Financial Statements, together with assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the year ending August 31, 2021, are included in the following notes:

Note 2.2	Right-of-use assets: Determination of the lease term for options to extend or terminate the lease
Note 2.3	Intangible assets: Impairment testing for CGUs containing goodwill, i.e. key assumptions used for value-in-use calculations
Note 2.7	Provisions: Recognition and measurement of provisions
Note 4.2	Employee benefit: Measurement of defined benefit liabilities, i.e. actuarial assumptions
Note 6	Income taxes: Recognition and measurement of current and deferred tax liabilities and assets for uncertain tax positions and availability of future taxable profits against which tax loss carry forwards can be utilized

#### D. Introduction of new standards and interpretations in 2020/21 and later

The Group has adopted new standards, amendments and interpretations to the existing International Financial Reporting Standards (IFRS) that are mandatory for periods starting on or after January 1, 2021. These adoptions did not have any material impact on the current reporting period.

The Group has also performed an assessment of the new standards and interpretations with effective date of January 1, 2021 and with planned application in fiscal year 2021/22. Based on this assessment, the Group does not expect that the new standards and interpretations will have a material impact on the Consolidated Financial Statements.

	Effective date	Applied /Planned application by the Group in
Amendments to Standards and Interpretations		
Amendments to References to Conceptual Framework in IFRS Standards	January 1, 2020	Fiscal year 2020/21
Definition of a Business (Amendments to IFRS 3)	January 1, 2020	Fiscal year 2020/21
Definition of Material (Amendments to IAS 1 and IAS 8)	January 1, 2020	Fiscal year 2020/21
Interest Rate Benchmark Reform (Amendments to IFRS 9, IAS 39 and IFRS 7)	January 1, 2020	Fiscal year 2020/21
Extension of the Temporary Exemption from Applying IFRS 9 (Amendments to IFRS 4)	January 1, 2020	Fiscal year 2020/21
Covid-19-Related Rent Concessions (Amendment to IFRS 16) and beyond 30 June 2021	June 1, 2020 / April 1, 2021	Fiscal year 2020/21
Interest Rate Benchmark Reform, Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16)	January 1, 2021	Fiscal year 2021/22
Onerous Contracts – Cost of Fulfilling a Contract (Amendments to IAS 37)	January 1, 2022	Fiscal year 2022/23

# **1** Operating Performance

#### **1.1 Segment information**

External segment reporting is based on the internal organizational and management structure, as well as on the internal information reviewed regularly by the Chief Operating Decision Maker. Barry Callebaut's Chief Operating Decision Maker has been identified as the Executive Committee.

The Executive Committee manages the business from a geographic view. Hence, Presidents were appointed for each Region. Since the Group's cocoa activities operate independently from the Regions, the Global Cocoa business is managed by the Executive Committee as its own segment in addition to the geographic regions of EMEA (Europe, Middle East and Africa), Americas and Asia Pacific. Furthermore, the Executive Committee also manages the Corporate functions independently. The Corporate segment mainly consists of headquarter services (including the Group's centralized Treasury department) to other segments. Thus, the Group reports the Corporate segment separately.

The Global Cocoa segment is responsible for the procurement of ingredients for chocolate production (mainly cocoa, sugar, dairy and nuts) and the Group's cocoaprocessing business. Global Cocoa generates approximately 57% of its revenues from transactions with other operating segments of the Group.

The regional chocolate businesses consist of chocolate production related to the Product Groups of Food Manufacturers focusing on industrial customers and Gourmet & Specialties focusing on products for artisans and professional users of chocolate such as chocolatiers, pastry chefs or bakers as well as products for vending machines.

2020/24

Global Cocoa comprises Group-wide sourcing and Global Cocoa processing functions for the benefit of all the Regions. Therefore, the major part of its operating profit (EBIT) is allocated to the Regions.

Segment revenue, segment operating profit (EBIT) and segment assets are measured based on IFRS principles.

Finance income and expense, the Group's share of result of equity-accounted investees and income taxes are not allocated to the respective segment for internal management purposes.

#### Additional entity-wide disclosures

### Information on geographical regions

Barry Callebaut is domiciled in Switzerland, however, its major revenues are generated in other countries. The following table shows revenues reported based on the geographic location of customers and non-current assets other than financial instruments, deferred tax assets and employee benefit assets.

	2020/21	2019/20	2020/21	2019/20

### Information on Product Groups

The Group has numerous products that are sold to external customers. Therefore, for internal review by the Chief Operating Decision Maker, information on products is aggregated on a Product Group level. The following table breaks down external revenues into Product Groups:

### Segment information by Product Group

in thousands of CHF	2020/21	2019/20 <sup>1</sup>
Cocoa Products	1,804,791	1,817,586
Food Manufacturers	4,273,841	4,118,662
Gourmet & Specialties	1,128,963	956,898
Revenue from external customers	7,207,595	6,893,146

1 Certain Gourmet & Specialties customers have been shifted to the Food Manufacturers Product Group to better serve them. The minor reallocation represents less than 1% of Gourmet & Specialties volume and sales revenues in fiscal year 2019/20.

In fiscal year 2020/21, the biggest single customer contributed CHF 822.0 million or 11.4 % of total revenues reported across various regions (2019/20: CHF 807.9 million or 11.7%). No other single customer contributed more than 10% of total consolidated revenue.

#### Accounting policies

**Revenue recognition** 

Revenue from sales and services represent the net sales revenue from raw materials, semi-processed and processed goods transferred to customers and for services related to food processing.

Revenue is measured based on the contractually agreed transaction price at the amount, which the Group expects to receive in exchange for transferring promised goods or services to the customer.

Revenue is generally recognized at the point in time, when control of the goods has been transferred to the customer, which is upon delivery or shipment of the goods, according to the applicable Incoterms. The payment terms are typically between 30 and 90 days.

The Group recognizes revenue over time for highly customized products for which the Group has no alternative use. The nature of the Group's business means that the production of these goods and its delivery occur in short succession. The revenue for these products is recognized over time using the output method 'units delivered'.

Appropriate provisions are made for all additional costs to be incurred in connection with the sales, including the cost related to returns of goods, which do not meet agreed specifications and quality-related claims.

Type of commercial agreement	Commercial principle
Contract business	Partnership agreements/Umbrella agreement The Group enters into long-term partnership/umbrella agreements of between three to ten years supported by a framework agreement between the Group and the customer governing the conduct of business, payment terms, rights to goods and services. Partnership agreements typically include legally enforceable annual volume purchase commitments. Firm purchase commitments are agreed for delivery periods of typically three to six months.
Price list business	Volume agreements The customer commits to legally enforceable firm purchase commitments for certain volumes of specified goods. The conduct of business is ordinarily governed by Group's general terms and conditions. Based on forecasted sales and raw materials prices, the
	Group establishes a price list for the products in its portfolio. The price list then applies to sales for a period of typically six to twelve months.

Operating segments are reported in a manner consistent with the internal Segment reporting reporting provided to the Chief Operating Decision Maker. The Chief Operating Decision Maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Group's Executive Committee, consisting of the Chief Executive Officer, the Chief Financial Officer and the Presidents of the Regions EMEA, Americas, Asia Pacific and Global Cocoa as well as the Chief Operations Officer, the Chief Innovation, Sustainability & Quality Officer and the Chief Human Resources Officer.

#### 1.2 Research and development expenses

in thousands of CHF	2020/21	2019/20
Research and development expenses	(29,685)	(32,170)

Research and development expenses not qualifying for capitalization are directly charged to the Consolidated Income Statement and are reported under "Marketing and sales expenses" and "General and administration expenses". The part qualifying for capitalization is reported as addition under internally generated assets in Note 2.3 – "Intangible assets".

### 1.3 Other income and expense

#### Composition of other income

in thousands of CHF	2020/21	2019/20
Rental income	421	641
Income from sustainability initiatives	1,300	1,919
Other	1,339	2,260
Total other income	3,060	4,820

#### Composition of other expense

in thousands of CHF	2020/21	2019/20
Restructuring costs	(296)	(1,931)
Litigations and claims	(9,517)	(9,589)
Net loss on sale of property, plant and equipment	(1,562)	(1,194)
Impairment of property, plant and equipment (Note 2.1)	(803)	(7,560)
Impairment of intangibles (Note 2.3)	(1,387)	(1,644)
Impairment of financial instruments	(3,549)	(4,134)
Acquisition related costs (Note 7.2/5.1)	(194)	(223)
Other	(501)	(1,856)
Total other expense	(17,809)	(28,131)

Gain on disposal of property, plant and equipment in the amount of CHF 0.5 million in fiscal year 2020/21 (2019/20: CHF 0.3 million) was netted against the loss on disposal of property, plant and equipment.

# 2 Operating Assets and Liabilities

### 2.1 Property, plant and equipment

2020/21	Land and buildings	Plant and machinery	Office equipment, furniture and motor vehicles	Under construction	Total
in thousands of CHF

as of August 31, 2020	304,584	1,090,387	96,913	28	1,491,912
Net as of August 31, 2020	368,215	933,262	21,450	168,826	1,491,753

Cash outflow amounted to CHF 233.4 million. CHF 0.1 million is related to purchases of property, plant and equipment that were acquired in the prior period. 1 Additions of CHF 2.4 million were granted and are non-cash relevant. Reclassified to "Intangible assets" (net CHF 0.1 million).

2

The Group periodically reviews the remaining useful lives of assets recognized in "Property, plant and equipment".

Impairment losses of CHF 0.8 million were recognized in "Property, plant and equipment" in fiscal year 2020/21 (2019/20: CHF 7.6 million).

Repair and maintenance expenses for the fiscal year 2020/21 amounted to CHF 78.5 million (2019/20: CHF 75.3 million).

As at August 31, 2021, no non-currents assets were pledged as security for financial liabilities (2020: nil).

### Accounting policies

Property, plant and equipment	Property, plant and equipment is measured at the acquisition or construction cost less accumulated depreciation and accumulated impair- ment losses. A straight-line method of depreciation is applied through the estimated useful life. Estimated useful lives of major classes of depreciable assets are:
	Buildings (including warehouses and installations) 20 to 50 years
	Plant and machinery 5 to 20 years
	Office equipment, furniture and motor vehicles 3 to 10 years
	least at each reporting date to assess whether they are recoverable in the form of future economic benefits. If the recoverable amount of an asset has declined below its carrying amount, an impairment loss is recognized to reduce the value of the assets to its recoverable amount. In determining the recoverable amount of the assets, expected cash flows are discounted
	to their present value.

### 2.2 Right-of-use assets

The Group leases land and buildings for use as office and warehouse space. Lease contracts are entered on an individual basis and contain a wide range of different terms and conditions. Lease terms are typically fixed for a period of three to ten years. In many cases, lease contracts for buildings contain extension options, which provide operational flexibility and security. Such options are considered individually to determine whether the Group is reasonably certain to exercise the option. Furthermore, the Group maintains a fleet of leased cars with an average lease term of three years and lease vehicles with an average lease term of seven years. Lease term for hardware is an average of five years.

The following expenses related to the Group's leasing activities are recognized in the income statement:

in thousands of CHF	2020/21	2019/20
Expense relating to short-term leases	5,867	5,775
Expense relating to leases of low-value assets	1,305	796
Expense relating to variable lease payments not included in the measurement of lease liabilities	671	229
Lease-related expenses	7,843	6,800
Depreciation of right-of-use assets	44,030	40,610
Interests on lease liabilities	5,311	4,796
Total amount recognized in the income statement	57,184	52,206

In fiscal year 2020/21, the Group's total cash outflow for lease payments was CHF 53.1 million, including interest paid (2019/20: CHF 43.0 million).

Ø

Accounting policies	
Definition of a lease	At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration.
Recognition and measurement	The Group recognizes a right-of-use asset and a lease liability at the lease commencement date.
of a lease	The lease liability is initially measured at the present value of the future lease payments that are not paid at the commencement date, discounted using the incremental borrowing rate defined on a Group level, specific to the currency of the lease contract. Lease payments included in the initial measurement of the lease liability include for example fixed payments and variable payments that depend on an index or rate, which are initially measured using the index or rate at the commencement date.
	The lease liability is subsequently measured at amortized cost using the effective interest method, decreased by lease payments made. The lease liability is remeasured in case of changes in future lease payments (i.e. index-based rents) or any changes in the assessments of extension or termination options. For such remeasurements, a corresponding adjustment generally is made to the right-of-use asset.
	The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability, plus any initial direct costs incurred, an estimate of costs for restoration obligations, payments made at or before the commencement date and less any lease incentives received. The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the lease term or the end of the useful life of the underlying asset (determined on the same basis as those of property, plant and equipment). In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.
	The Group applies judgment to determine the lease terms for lease contracts that include renewal or termination options. The assessment of whether the Group is reasonably certain to exercise such options impacts the lease term which significantly affects the amount of right-of-use assets and lease liabilities recognized in the balance sheet.
Short-term leases and leases of low- value assets	The Group has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of twelve months or less and do not contain a purchase option, and leases of low-value assets. The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Net as of August 31, 2020	822,779	9,451	141,579	11,875	985,684

1 Reclassified from "Property, plant and equipment" (net CHF 0.1 million).

Additions and reclassification from under development to internally generated intangible assets amounted to CHF 43.3 million in fiscal year 2020/21 (2019/20: CHF 54.5 million). This mainly included costs related to various projects of internally generated software and amounted to CHF 38.5 million (2019/20: CHF 51.6 million). The remainder is related to the development of recipes and innovations of CHF 4.7 million that were recorded under internally generated intangible assets (2019/20: CHF 2.9 million). Additions to other intangible assets mainly included projects under development.

The remaining amortization period for brand names varies between one and ten years, for licenses up to ten years, for software between one and eight years and for other including patents between one and twelve years.

### Impairment testing for cash-generating units containing goodwill

The carrying amount of goodwill for the Group amounts to CHF 829.6 million (2019/20: CHF 822.8 million). The allocation to the segments is as follows:

as of August 31,	2021	2020
in million CHF		
Global Cocoa	441.2	437.3
EMEA	303.1	301.4
Americas	80.7	79.4
Asia Pacific	4.6	4.7
Total	829.6	822.8

Goodwill acquired in a business combination is allocated to the respective segment that is expected to benefit from the synergies of the business combination, at acquisition date. Due to the Group's fully integrated business in the Regions, the segments represent the lowest level within the entity at which the goodwill is monitored for internal management purposes. Thus, the impairment test is performed on a segment level.

For the impairment test, the recoverable amount of a cash-generating unit is based on its value-in-use and is compared to the carrying amount of the corresponding cashgenerating unit. Future cash flows are discounted using a pre-tax rate that reflects current market assessments based on the weighted average cost of capital (WACC).

The Group performs its impairment test during the fourth quarter of the fiscal year. This approach was chosen because the Mid-Term Plan, covering the next five fiscal years, is updated annually in the third quarter. The Mid-Term Plan is based on the assumption that there are no major changes to the Group's organization. The residual value is calculated from an estimated continuing value, which is primarily based on the fifth year of the Mid-Term Plan. The terminal growth rate used for determining the residual value does not exceed the expected long-term growth rate of the industry.

The annual impairment tests did not result in a need to recognize impairment losses in fiscal year 2020/21.

The key sensitivities in the impairment test are the WACC as well as the terminal growth rate.

### Key assumptions used for value-in-use calculations

	2021		2020	0
	Discount rate	Terminal growth rate	Discount rate	Terminal growth rate
Global Cocoa	7.7%	1.2%	9.2%	0.8%
EMEA	6.4%	0.8%	7.9%	0.2%
Americas	6.8%	2.0%	7.6%	1.5%
Asia Pacific	6.8%	1.5%	7.5%	1.9%

The Group has carried out a sensitivity analysis, containing various scenarios. Taking reasonable possible changes in key assumptions into account, no impairment losses have been revealed.

#### **Accounting policies**

Goodwill	Goodwill on acquisitions is the excess of acquisition date fair value of the total consideration transferred plus the recognized amount of any non-controlling interest in the acquiree and the acquisition date fair value of assets acquired, liabilities and contingent liabilities assumed. Following the initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment annually on the same date or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. Negative goodwill is recognized directly in the Consolidated Income Statement.
	At the acquisition date, any acquired goodwill is allocated to each of the cash-generating units (CGUs). The Group defines its CGUs for goodwill impairment testing based on the way that it monitors and derives economic benefits from the acquired goodwill. The impairment tests are performed by comparing the carrying value of the assets of these CGUs with their recoverable amount, based on their value in use, which corresponds to their future projected cash flows discounted at an appropriate pre-tax rate of return. The cash flows correspond to estimates made by Group Management in financial plans and business strategies covering a period of five years after making adjustments to consider the assets in their current condition. They are then projected to perpetuity using a multiple which corresponds to a steady growth rate. The Group assesses the uncertainty of these estimates by making sensitivity analyses. Where the recoverable amount of the CGUs is less than the carrying amount, an impairment loss is recognized.
Research and development costs	Research costs are expensed as incurred.
ucvelopment costs	Development costs for projects related to recipes and product innovations are capitalized as an intangible asset if it can be demonstrated that the project is expected to generate future economic benefits, if it is probable that those future economic benefits will flow to the entity and the costs of the asset can be measured reliably. Development costs previously recognized as an expense are not recognized as an asset in a subsequent period. Development costs that have been capitalized are amortized on a straight-line basis over the period of their expected useful life. The amortization periods adopted do not exceed five years.

Brand names, licenses and other intangible assets	Other acquired intangible assets include brand names, licenses, customer relationships, patents and trademarks, software and projects to improve the processes. Patents and licenses are amortized over their period of validity. All other intangible assets are amortized on a straight-line basis over their anticipated useful life not exceeding ten years. The amortization charge is included in the positions "General and administration expenses" and "Cost of goods sold" in the
	Consolidated Income Statement.

#### 2.4 Inventories

as of August 31,	2021	2020
in thousands of CHF		
Cocoa beans stocks	733,872	772,030
Semi-finished and finished products	1,079,440	953,859
Other raw materials and packaging materials	230,021	184,028
Total inventories	2,043,333	1,909,917

As at August 31, 2021, the value of cocoa and chocolate inventories designated in a hedging relationship amounted to CHF 1,134.6 million (2019/20: CHF 1,187.4 million), on which a fair value hedge adjustment of CHF 15.4 million was recorded (2019/20: CHF 2.2 million). For further detail of hedged inventories refer to Note 3.7.9 -"Effect of hedge accounting on the financial position and performance".

In 2020/21, materials used of CHF 4,951.3 million (2019/20: CHF 4,796.5 million) were recognized as an expense during the year and included in "Cost of goods sold".

In fiscal year 2020/21, inventory write-downs of CHF 31.7 million were recognized as an expense (2019/20: CHF 40.0 million).

As at August 31, 2021, no inventories were pledged as security (August 31, 2020: nil)

### Accounting policies

Inventories	Inventories are measured at the lower of cost and net realizable value. The cost of inventories comprises the costs of materials, direct production costs including labor costs and an appropriate proportion of production overheads and factory depreciation. Those inventories that are allocated as hedged items in a fair value hedge relationship are adjusted for the change in the fair value attributable to the hedged cocoa price risk.
	The weighted average method is used in assigning the cost of inventories.

### 2.5 Trade receivables and other current assets

as of August 31,	2021	2020
in thousands of CHF		
Trade receivables	484,974	387,404
Accrued income	32,362	22,643
Loans and other receivables	38,446	12,257
Other current financial assets	20,278	16,655
Receivables representing financial assets	576,060	438,959
Prepayments	57,791	57,655
Other current non-financial assets	707	1,802
Other tax receivables and receivables from government	125,393	112,369
Other receivables	183,891	171,826
Total trade receivables and other current assets	759,951	610,785

The Group runs asset-backed securitization programs, whereby trade receivables are sold at their nominal value minus a discount in exchange for cash. The amount of the receivables sold net of discounts as at August 31, 2021, was CHF 360.5 million (2020: CHF 323.8 million). This amount was derecognized from the balance sheet. The amount is the combination of the gross value of the receivables sold of CHF 381.2 million (2020: CHF 340.9 million) and the discount applicable of CHF 20.7 million (2020: CHF 17.1 million).

Net amounts payable to these programs amounted to CHF 70.3 million as at August 31, 2021 (2020: CHF 85.8 million), consisting of the balance of receivables collected before the next rollover date of CHF 91.0 million (2020: CHF 102.9 million), less the discount on receivables sold of CHF 20.7 million (2020: CHF 17.1 million). These amounts are included in Note 2.6 – "Trade payables and other current liabilities" on a net basis.

The discount is retained by the programs to establish a dilution reserve, a yield reserve, and an insurance first loss reserve.

Trade receivables with the fair value of CHF 87.1 million (and CHF 87.2 million nominal amount) as at August 31, 2021 (2020: fair value CHF 75.9 million, nominal amount CHF 76.0 million), are held for realization through sale under the asset-backed securitization programs and are therefore classified as measured at fair value through profit or loss. All other trade receivables, accrued income, loans, other receivables and other current financial assets are measured at amortized cost.

Interest expense paid under the asset-backed securitization programs amounted to CHF 3.1 million (2019/20: CHF 4.2 million) and was reported under "Interest expense".

For detailed information about the expected credit losses calculated on the Group's financial assets measured at amortized cost refer to Note 3.7.4 - "Credit risk and concentration of credit risk".

### Accounting policies

Accounting policies			
Trade receivables		ne exception of those receivables that are backed securitization programs, are stated at e expected credit losses.

### 2.6 Trade payables and other current liabilities

as of August 31,	2021	2020
in thousands of CHF		
Trade payables	891,208	652,379
Accrued expenses	134,408	102,681
Other payables	199,987	188,759
Payables representing financial liabilities	1,225,603	943,819
Accrued wages and social security	140,952	119,700
Other taxes and payables to government	64,008	51,951
Deferred income	2,907	4,173
Other liabilities	207,867	175,824
Total trade payables and other current liabilities	1,433,470	1,119,643

The Group has payables related to asset-backed securitization programs, see Note 2.5 - "Trade receivables and other current assets". Other payables also consist of outstanding ledger balances with commodity brokers.

Accounting policies	
Trade payables and other current financial liabilities	Trade payables and other current financial liabilities are initially recognized at fair value, net of transaction costs, when the Group becomes a party to the contractual provisions. They are subsequently carried at amortized cost using the effective interest rate method. A financial liability is derecognized when the obligation is discharged, cancelled, or expires.

#### 2.7 Provisions

in thousands of CHF	Restructuring	Litigation & claims	Other	Total
as of September 1, 2020	1,432	7,115	17,661	26,208
Additions	1,789	17,354	7,787	26,930
Use of provisions <sup>1</sup>	(963)	(2,356)	(7,412)	(10,731)
Release of unused provisions	(1,493)	(1,156)	(320)	(2,969)
Currency translation adjustments	3	59	363	425
as of August 31, 2021	768	21,016	18,079	39,863
of which:				
Current	768	19,433	10,953	31,154
Non-current		1,583	7,126	8,709

1 The amount under "Other" includes a reclassification of CHF 3.6 million to inventory. The reclassification is not cash flow relevant.

#### Litigation & claims

The amount includes provisions for certain litigations and claims that have been recognized to cover legal and administrative proceedings that arise in the ordinary course of business. Group companies are involved in various legal actions and claims as they arise in the ordinary course of the business. This includes labor and non-income tax claims, claims related to transactions such as acquisitions and disposals or claims from customers for product liability and recalls. Customer claims are generally covered by a global insurance policy.

Provisions have been made, where quantifiable, for probable outflows. In management's opinion, after taking appropriate legal advice, the outcome of these legal claims will not give rise to any significant loss beyond the amounts provided as of August 31, 2021. Any payments to be made will depend upon the date on which legally binding decrees and decisions are issued.

#### Other provisions

Other provisions include amounts that have been provided to cover the negative outcome of onerous contracts. The total provision for onerous contracts amounted to CHF 7.9 million as at August 31, 2021 (2020: CHF 7.9 million), and is expected to be fully utilized during the coming twelve months. The non-current portion was partially carried on from previous fiscal year and covers different types of risk, including non-income tax risks and warranties, and the majority is expected to be used within three years.

#### Accounting policies

Provisions	Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate thereof can be made.
	Provisions are recorded for identifiable claims and restructuring costs. Restructuring provisions mainly comprise employee termination payments. Specific provisions for restructuring costs are recorded at such time as the management approves the decision to restructure and a formal plan for restructuring is communicated.

## **3 Capital and Financial Risk Management**

#### 3.1 Capital management

The Group continues to apply its policy to maintain a sound capital base to support the continued development of the business. The Board of Directors seeks to maintain a prudent balance between debt and equity. In compliance with bank covenants, there is also a minimum tangible net worth value (equity – intangible assets) set at CHF 750 million.

The target payout ratio to shareholders is set in a range of 35% to 40% of the net profit in the form of a dividend. The target payout ratio and the form of the payout recommended by the Board is reviewed on an annual basis and is subject to the decision at the Annual General Meeting of Shareholders.

The Group's subsidiaries have complied with applicable local statutory capital requirements.

### 3.2 Equity

#### Share

as of August 31,	2021	2020
in thousands of CHF		
Share capital is represented by 5,488,858 (2020: 5,488,858) authorized and issued shares of each CHF 0.02 fully paid in (2020: 0.02)	110	110

#### Share capital and dividends

The issued share capital is divided into 5,488,858 registered shares with a nominal value of CHF 0.02 (2020: CHF 0.02). All of the issued shares are fully paid and validly issued and are not subject to calls for additional payments of any kind. The Company has one class of shares, which carries no right to a fixed dividend.

By resolution of the Annual General Meeting on December 9, 2020, the shareholders approved the proposed distribution of dividends in the amount of CHF 22.00 per share, effected through a dividend payment of CHF 120.7 million. The payment was made to shareholders on January 7, 2021.

During the fiscal year 2019/20, the payout of CHF 26.00 per share was effected through a dividend payment out of retained earnings in the amount of CHF 142.7 million. The payment was made to shareholders on January 8, 2020.

#### **Treasury shares**

Treasury shares are valued at weighted average cost and have been deducted from equity. The book value of the treasury shares as at August 31, 2021, amounted to CHF 15.6 million (2020: CHF 23.3 million).

The fair value of the treasury shares as at August 31, 2021, amounted to CHF 18.4 million (2020: CHF 25.7 million). As at August 31, 2021, the number of outstanding shares amounted to 5,480,985 (2020: 5,476,021) and the number of treasury shares to 7,873 (2020: 12,837). During this fiscal year, 9,138 shares have been purchased, 14,102 transferred to employees and members of the Board of Directors under the employee stock ownership program (2019/20: 14,840 purchased; 13,301 transferred).

#### **Retained earnings**

As at August 31, 2021, retained earnings contain legal reserves of CHF 15.6 million (2020: CHF 23.3 million), which are not distributable to the shareholders pursuant to Swiss law.

#### Hedging reserves

Hedging reserves comprise the effective portion of the cumulative net change in the fair value of cash flow hedging instruments related to hedged transactions that are expected to occur. For further detail about the hedge reserves, refer to Note 3.7.9 – "Effect of hedge accounting on the financial position and performance".

#### Cumulative translation adjustment (CTA)

Cumulative translation adjustments comprise all foreign currency differences arising from the translation of the financial statements of foreign operations.

### Movements in non-controlling interests

in thousands of CHF	2020/21	2019/20
as of September 1,	1,770	14,320
Non-controlling share of profit/(loss)	566	(4,560)
Change in non-controlling interests	-	(7,676)
Non-controlling share of other comprehensive income	24	(314)
as of August 31,	2,360	1,770

The non-controlling interests are not material for the Group.

Accounting policies	
Transactions with non-controlling interests	The Group applies the policy of treating transactions with non-controlling interests equal to transactions with equity owners of the Group. For purchases from non-controlling interests, the difference between consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposal to non-controlling interests are also recorded in equity.

### 3.3 Earnings per share

in CHF	2020/21	2019/20
Basic earnings per share (CHF)	70.04	57.66
Diluted earnings per share (CHF)	69.84	57.46

The following amounts of earnings have been used as the numerator in the calculation of basic and diluted earnings per share:

in thousands of CHF	2020/21	2019/20
Net profit for the year attributable to shareholders of the parent company, used as numerator for basic earnings per share	383,939	316,054
Adjusted net profit for the year used as numerator for diluted earnings per share	383,939	316,054

The following numbers of shares have been used as the denominator in the calculation of basic and diluted earnings per share:

	2020/21	2019/20
Number of shares issued	5,488,858	5,488,858
Weighted average number of treasury shares held	(7,288)	(7,414)
Weighted average number of ordinary shares outstanding, used as denominator for basic earnings per share	5,481,570	5,481,444
Dilution potential of equity-settled share-based payments	15,910	18,927
Adjusted weighted average number of ordinary shares, used as denominator for diluted earnings per share	5,497,480	5,500,371

### 3.4 Cash and cash equivalents

Cash and cash equivalents amounted to CHF 1,095.8 million as of August 31, 2021 (prior year CHF 1,386.0 million), and comprised cash on hand, cheques, bank balances and unrestricted bank deposit balances with an original maturity of 90 days or less. Bank overdrafts amounted to CHF 63.6 million as of August 31, 2021 (prior year CHF 103.6 million), and are repayable on demand, forming an integral part of the Group's cash management, are included as a component of cash and cash equivalents for the purpose of the Consolidated Cash Flow Statement.

### **3.5 Financial liabilities**

#### 3.5.1 Bank overdrafts and short-term debt

as of August 31,	2021	2020
in thousands of CHF	Carrying a	mounts
Bank overdrafts	63,564	103,603

Long-term financial liabilities	2,154,518	2,156,653	2,162,849	2,229,900	

On June 20, 2013, the Group issued a 5.5% Senior Note with maturity in 2023 for an amount of USD 400 million (CHF 364 million). The Senior Note was issued at a price of 98.122% and includes a coupon step-up clause of 0.25% (limited to 1.00% per annum) per downgraded notch per rating agency. The coupon currently amounts to 5.5% (2019/20: 5.5%).

On May 24, 2016, the Group issued a 2.375% Senior Note with maturity in 2024 for an amount of EUR 450 million (CHF 484 million). The Senior Note was issued at a price of 99.104%. The coupon amounts to 2.375%.

On October 3, 2019, the Group extended the maturity of its EUR 750 million Revolving Credit Facility to June 2024. On March 24, 2020, the Group amended its

EUR 750 million Revolving Credit Facility into a EUR 1,000 million Revolving Credit Facility with maturity in 2024. This Facility was not used in the fiscal year 2020/21.

There are financial covenants related to the Revolving Credit Facility which comprise of profitability per tonne, interest cover ratio and tangible net worth value.

On February 13, 2019, the Group issued a EUR 467 million (CHF 502 million) and CHF 152 million Schuldscheindarlehen. An amount of EUR 191 million with maturity in 2026, an amount of EUR 254 million with maturity in 2027 and an amount of EUR 22 million with maturity in 2029 which were raised in euros. An amount of CHF 11 million with maturity in 2026, an amount of CHF 131 million with maturity in 2027 and an amount of CHF 10 million with maturity in 2029 which were raised in Swiss francs. The weighted average interest rate at issuance date is 1.47% p.a.<sup>1</sup>

On May 27, 2020, the Group issued a EUR 60 million (CHF 65 million) private placement with maturity in 2022.

On July 27, 2020, the Group issued a EUR 377 million (CHF 408 million) and CHF 20 million Schuldscheindarlehen. This results in an amount of EUR 128.5 million with maturity in 2025, an amount of EUR 65 million with maturity in 2027, an amount of EUR 126.5 million with maturity in 2028, and an amount of EUR 57 million with maturity in 2030 which were raised in euros. An amount of CHF 15 million with maturity in 2025, an amount of CHF 5 million with maturity 2027 which were raised in Swiss francs. The weighted average interest rate is 1.57% p.a.<sup>2</sup>

The USD 400 million Senior Note, the EUR 450 million Senior Note, the EUR 1,000 million Revolving Credit Facility, the EUR 467 million and CHF 152 million Schuldscheindarlehen, the EUR 60 million private placement, the EUR 377 million and CHF 20 million Schuldscheindarlehen all rank pari passu. The Senior Notes, the Revolving Credit Facility, the private placement as well as the two Schuldscheindarlehen issuances are guaranteed by Barry Callebaut AG.

Given lower working capital requirements and the available cash balance, the Group further reduced its debt portfolio in July 2021 by prepaying part of the floating-rated Schuldscheindarlehen issued in July 2020 for an amount of CHF 27.0 million, and decided not to roll forward commercial paper hedged with fixed-to-floating interest rate derivatives for an amount of CHF 135.2 million.

as of August 31,	2021	2020
in thousands of CHF		
2021/22	-	93,305

Accounting policies				
Financial liabilities	Financial liabilities are initially recognized at fair value, net of transaction costs, when the Group becomes a party to the contractual provisions. They are subsequently carried at amortized cost using the effective interest rate method.			
	A financial liability is derecognized when the obligation is discharged, cancelled, or expires.			
Lease liabilities	The Group recognizes a right-of-use asset and a lease liability at the lease commencement date.			
	The lease liability is initially measured at the present value of the future lease payments that are not paid at the commencement date, discounted using the incremental borrowing rate defined on a Group level, specific to the currency of the lease contract. Lease payments included in the initial measurement of the lease liability include for example fixed payments and variable payments that depend on an index or rate, which are initially measured using the index or rate at the commencement date.			
	The lease liability is subsequently measured at amortized cost using the effective interest method, decreased by lease payments made. The lease liability is remeasured in case of changes in future lease payments (i.e. index-based rents) or any changes in the assessments of extension or termination options. For such remeasurements, a corresponding adjustment generally is made to the right-of-use asset.			
	The Group applies judgment to determine the lease terms for lease contracts that include renewal or termination options. The assessment of whether the Group is reasonably certain to exercise such options impacts the lease term which significantly affects the amount of lease liabilities and assets recognized in the balance sheet.			
Short-term leases and leases of low- value assets	The Group has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of twelve months or less and do not contain a purchase option, and leases with asset's fair value, when newly purchased, is lower than CHF 5,000. The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.			

# 3.6 Capital and lease commitments and guarantees

### Capital and lease commitments

Total capital commitments	14,337	4,326
Leased assets	14,357	
Intangible assets	128	101
Property, plant and equipment	5,254	4,225
in thousands of CHF		
as of August 31,	2021	2020

Leased assets commitments are mainly related to buildings.

## Guarantees in favor of third parties

Group companies have issued guarantee commitments for the fiscal year 2020/21 in the amount of CHF 0.6 million (2019/20: CHF 1.3 million). These are mainly related to third-party suppliers.

#### 3.7 Financial risk management

The nature of its business exposes the Group to a variety of financial risks including the effects of changes in market prices (commodity prices, foreign exchange rates, and interest rates) as well as credit risks and liquidity risks.

The Group's overall strategy for managing these risks is consistent with the Group's objectives to maintain cost leadership, reduce earnings volatility in a cost-effective manner and minimize potential adverse effects of such market exposures on the financial performance of the Group. The Group's sourcing centers and Treasury department continuously monitor and hedge the exposures to commodity price risk, foreign currency and interest rate risk. The Group Commodity Risk Committee (GCRC) and Finance Committee regularly reviews, and monitors, the adherence to policies and defined risk limits. The Group manages its business based on the following two business models:

- Contract business: sales contracts for cocoa ingredients and industrial or gourmet chocolate, where Barry Callebaut has entered into contracts with customers to deliver fixed quantities at fixed prices. These contractually fixed prices are generally based on the forward market prices of the raw material components valid at the contract date for the forward delivery date on which the cocoa ingredients or chocolate is planned to be delivered to the customers.
- Price list business: Barry Callebaut sets price lists for certain Gourmet, Specialties & Decorations, and Beverage products. These price lists are normally updated at intervals of six to twelve months. Customers buy products based on the issued price lists without fixed commitments on quantities.

#### 3.7.1 Commodity price risks

#### a) Commodity risk management

The manufacturing of the Group's products requires raw materials such as cocoa beans, sugar and sweeteners, dairy, nuts, oils and fats. Therefore, the Group is exposed to commodity price risks.

The Group's sourcing centers manage the commodity risk in compliance with the Group Commodity Risk Management (GCRM) Policy. The GCRC monitors the Group's commodity risk management activities and acts as the decision-making body for the Group in this respect. The members of the GCRC include the Group's Chief Financial Officer (CFO) who acts as Chairman of the Committee, the President of Global Cocoa, the VP Group Accounting, Reporting & Risk Management, the CFO Global Cocoa, the VP Global Cocoa Trading & Sourcing, the Head of Global Sourcing (for non-cocoa materials) and the VP Group Treasury & Tax.

The GCRC reports to the Group's Audit, Finance, Risk, Quality & Compliance Committee (AFRQCC) and must inform the latter about key Group commodity risk issues and the key mitigation decisions taken. The AFRQCC reviews and approves GCRC requests and ensures that the commodity risk management strategy is consistent with the Group's objectives. It also sets the Group's Value at Risk (VaR) limit for the major raw material components. The AFRQCC makes recommendations to the Board of Directors and advises the Board of Directors on important risk matters and/or asks for approval. The Board of Directors is the highest approval authority for all GCRM matters and approves the GCRM Policy as well as the Group VaR limit.

The Group applies a 95% ten-day VaR limit to manage the consolidated exposure to commodity price risk. The VaR framework of the Group is based on the standard historical VaR methodology, taking 2,000 days (equivalent to seven years) of the most recent prices, based on which the day-to-day relative price changes are calculated. This simulation of past market conditions is not predicting the future movement in commodity prices, and therefore it does not represent actual losses. It only represents an indication of

the future commodity price risks based on historical volatility. VaR is applied to materials with prices considered to exceed certain volatility levels (e.g. cocoa beans and cocoa products, dairy products, sugar and sweeteners, nuts, oils and fats). As at August 31, 2021, the Group had a total VaR for raw materials of CHF 9.3 million (2020: CHF 9.4 million), well within the Group limit. The average VaR over the fiscal year 2020/21 was CHF 8.0 million (2019/20: CHF 11.5 million). The VaR is used together with a calculation of the expected shortfall and worst cases as well as the use of stress test scenarios.

The GCRC allocates the Group VaR limit into VaR limits for cocoa and non-cocoa raw materials such as sugar, dairy, oils and fats. These two VaR limits are then allocated to limits in tonnes to the related risk reporting units for each of the two areas.

#### b) Cocoa price risk and the Group's hedging strategy

The Group's purchasing and sourcing centers make sourcing and risk management decisions for cocoa beans, semi-finished cocoa products and ingredients including hedging commodity price risk exposures. Within the overall limits as defined by the AFRQCC, the Group's purchasing and sourcing centers can also act as a broker-trader with the objective to generate profits from fluctuations in raw material prices or broker-trader margins.

The fair value of the Group's open sales and purchase commitments and inventory are fluctuating in line with price movements in the respective commodity markets and are therefore hedged. It is the Group's policy to hedge its cocoa price risk resulting from its inventory and purchase and sales contracts. The cocoa price risk component in cocoa inventories, purchase and sales contracts as well as chocolate inventories and sales contracts are hedged with exchange traded or over-the-counter cocoa bean derivatives applying fair value hedge accounting. The Group also applies cash flow hedge accounting whereby the cocoa price risk and foreign exchange risk from forecasted sales are hedged with cocoa bean futures and foreign exchange forward contracts.

In order to calculate the cocoa bean price risk exposure embedded in the various cocoa ingredients and chocolate inventories, purchase and sales contracts, the cocoa processing entities translate the various cocoa ingredient volumes of these positions into cocoa bean equivalents, using technical yields (to calculate how many cocoa beans are needed to produce those cocoa ingredient volumes). These technical ratios vary according to cocoa ingredient types and cocoa-processing units. The chocolate entities calculate the bean equivalent in their positions using the prevailing market/commercial ratios. The entities use this approach and these ratios to enter into the appropriate volume of hedging instruments in order to hedge the cocoa bean price risk component in their positions. The Group also uses the same hedging ratios in hedge accounting as described above.

The cocoa bean price risk component is contractually specified in the purchase and sales contracts of cocoa ingredients and chocolate products. Therefore, the cocoa bean price risk component is considered separately identifiable and reliably measurable in the Group's hedged items (cocoa ingredients purchase contracts, cocoa inventories, chocolate inventories, cocoa ingredients sales contracts and chocolate sales contracts) as well as in its hedging instruments (cocoa bean futures and other contracts accounted for as derivatives).

#### c) Sugar price risk hedges

The Group applies cash flow hedge accounting for hedging relationships when it hedges its commodity price risk and its foreign exchange risks attributable to its forecasted sugar purchases with sugar futures and with foreign exchange forward contracts, respectively. When the Group enters into agreements with sugar suppliers where the price of the

forecasted sugar purchases will be indexed to the raw sugar world market price, it hedges these forecasted sugar purchases with sugar futures.

The raw sugar world market price risk component is a contractually specified element in the hedged items. Therefore, the raw sugar world market price risk component is considered separately identifiable and reliably measurable in the Group's hedged items (forecasted sugar purchases) as well as in its hedging instruments (sugar futures).

#### d) Fuel price risk hedges

The Group is exposed to fuel oil prices through fuel index commercial contracts with shipping and logistics companies. The Group enters into correlated derivative contracts to mitigate the fuel price volatility associated with the highly probable expense. The hedging relationship is accounted as cash flow hedges. The GCRC approves the duration of hedged exposure and applies counterparty limits to monitor the derivative instruments' credit exposure.

#### 3.7.2 Foreign currency risks

The Group operates across the world and consequently is exposed to multiple currency risks, albeit primarily in CHF, EUR, USD, and GBP. The Group actively monitors its transactional currency exposures and consequently enters into foreign currency hedges with the aim of preserving the value of assets, commitments, and anticipated transactions. The related accounting treatment is explained in the section "Accounting policies".

All risks relating to foreign currency exposures of assets and liabilities, certain unrecognized firm commitments and highly probable forecasted purchases and sales are centralized as far as possible within the Group's Treasury department, where the hedging strategies are defined.

Accordingly, the consolidated foreign currency exposures are hedged in compliance with the Group's Treasury Policy, mainly by means of forward currency contracts entered into with financial institutions of a high credit rating. The Group's Treasury Policy imposes a dual risk control framework of both open position limits and near-time fair valuation of net currency exposures. Both levels of control are substantially interlinked, avoiding excessive net currency exposures and substantial volatility in the Consolidated Income Statement.

The Group's Treasury department is supervised by the Group Finance Committee, which meets on a regular basis. The Group Finance Committee monitors the Group's foreign currency risk position and acts as a decision-taking body for the Group in this respect. The Group Finance Committee consists of the Group's CFO, the VP Group Financial Planning & Analysis, the VP Group Treasury & Tax, the VP Group Accounting, Reporting & Risk Management, and other Group Finance stakeholders.

The Group's Treasury Policy, giving guidance on treasury risk management including foreign currency and interest rate risks, is approved by the AFRQCC. The Group's Risk Management department reviews the consistency of the Group's treasury management strategy with the Group's Treasury Policy and reports the status to the Group's CFO periodically. The AFRQCC is informed by the CFO about the status and important matters in their quarterly meetings and approves requests of the Group Finance Committee on important treasury risk matters including foreign currency risks for recommendation to the Board of Directors. The Board of Directors is the highest approval authority for all Group Treasury Risk Management matters.

The table below provides an overview of the net exposure of CHF, EUR, USD, and GBP against the main functional currencies in the Group. According to the Group's Treasury Policy, foreign exchange exposures are hedged as from identification on an intraday basis in line with the approved exposure limits. In case of small deviations from

the agreed foreign exchange exposure limits, approval has to be sought from the Group's Treasury and Risk Management department. For significant deviations, approval from the AFRQCC is required. Companies with the same functional currency are shown in one group. The CFA in Côte d'Ivoire, XOF, and respectively Cameroon, XAF, both have fixed-rate regimes. At present, both are pegged, independently from each other, at 656 per euro. The Serbian dinar (RSD) is a managed floating exchange rate linked to the euro.

#### as of August 31, 2021 2020 Net exposure in thousands of CHF EUR USD GBP CHF EUR USD GBP CHF/EUR/USD/GBP CHF 49,418 123 (595) (378) (32,950) (130) (138) (5,836) (29,662) 8,340 18,183 (9,482) EUR USD (619) (88) (208) (260) (1,190) (623) BRL (118) 744 (67) (118) 1,040 177 \_ GHS 1 (38) 5,449 \_ \_ 29 (1,745) 5 MXN \_ (514) -\_ (73,309) RSD \_ RUB \_ 1,272 (8,589) 114 248 (3,548) (14) \_ XAF (22,451) (20,056) XOF 14,836 29,814 Total (874) (78,882) (11,383) (30,134) 7,967 (23,094) 63,716 (10,249)

Net foreign currency exposures against major functional currencies

In order to quantify and manage the Group's consolidated exposure to foreign currency risks, the historical VaR has been implemented. The VaR concept serves as the analytical instrument for assessing the Group's foreign currency risk incurred under normal market conditions. The VaR indicates the loss which, within a time horizon of one day, will not be exceeded at a confidence level of 95% using seven years of historical market prices for each major currency pair. The VaR is used together with the calculation of the expected shortfall and worst cases as well as the use of stress test scenarios. The VaR is based on static exposures during the time horizon of the analysis. However, the simulation of past market conditions is not predicting the future movement in foreign currency rates. Therefore, it does not represent actual losses. It only represents an indication of future foreign currency risks. As of August 31, 2021, the Group had a VaR of CHF 0.4 million (2020: CHF 0.5 million). The average VaR over the fiscal year 2020/21 was CHF 0.2 million (2019/20: CHF 0.4 million).

#### Value at Risk per main exposure currencies

as of August 31,	2021	2020
Value at Risk on net exposures in thousands of CHF Total for the Group and per main exposure currencies		
Total Group	444	503
	~ ~	
CHF	/	41
EUR	180	180
USD	184	503
GBP	306	95
Others	285	34
Diversification effect	54%	41%

#### 3.7.3 Interest rate risks

The Group is exposed to changes in interest rates through its short- and long-term debt obligations. The Group's Treasury department manages and oversees the financing of the Group, and the related interest rate risks and, to the extent possible, provides the necessary liquidity in the required functional currency for the companies of the Group. Consequently, the Group's debt obligations are adjusted with the real currency mix of the Group's liabilities in order to reflect the correct exposure to interest rates.

It is the Group's policy to manage its interest costs using an optimal mix of fixed and floating rate debt. This is achieved by entering into interest rate derivative instruments in which the Group exchanges at fixed and floating interest rates. To avoid volatility in the Consolidated Income Statement, cash flow hedge accounting is applied to those derivative instruments.

As described in the section "Foreign currency risks", the Group's Treasury department is supervised by the Group Finance Committee, which meets on a regular basis. The Group Finance Committee monitors the Group's interest rate risk and acts as a decisiontaking body for the Group in this respect.

The Group's Treasury Policy also covers the management of interest rate risks. The VP Group Treasury & Tax reports the status periodically to the Group's CFO, who informs the AFRQCC in their quarterly meetings. The AFRQCC approves requests from the Group Finance Committee on important treasury matters, including interest rate risks, and provides recommendations to the Board of Directors, which is the highest approval authority for all Group treasury matters.

The following schedule provides an overview of all interest-bearing items per yearend closing:

as of August 31,	2021	2020
in thousands of CHF		
Fixed interest-bearing items		
Carrying amount of financial liabilities	1,773,412	1,662,431
Reclassification due to interest rate derivative	340,106	494,202
Net fixed interest position	2,113,518	2,156,633
Floating interest-bearing items		
Carrying amount of financial assets	(1,097,299)	(1,392,227)
Carrying amount of financial liabilities	605,172	1,095,742
Reclassification due to interest rate derivative	(340,106)	(494,202)
Net floating interest position	(832,233)	(790,687)

#### Sensitivity analysis on interest rate risks

The following table shows the impact of a parallel shift of interest rates by 100 basis points (bps) up and 10 bps down on the Group's equity and Consolidated Income Statement, net of tax. The calculation is performed on both, the portion of the outstanding debt (excluding the asset-backed securitization programs; see Note 2.5 "Trade receivables and other current assets") at floating interest rates and the outstanding derivatives exchanging floating into fixed interest rates at the respective year-end. This sensitivity analysis only indicates the potential impact for the respective fiscal year at the prevailing conditions in the financial markets. Consequently, it does not represent actual or future gains or losses, which are strictly managed and controlled, as stipulated by the Group's Treasury Policy.

as of August 31,		202	21		2020			
Impact on	Income st	Income statement		Equity		atement	Equity

Interest rate swaps	-	_	17,422	(1,692)			23,295	(2,106)
Total interest rate sensitivity	4,273	(427)	17,422	(1,692)	5,811	(581)	23,295	(2,106)

#### 3.7.4 Credit risk and concentration of credit risk

Credit risk arising from customers, i.e. the risk of counterparties defaulting, is governed by the Group's Credit Management Policy. This policy defines the Group's credit management process such as the roles and responsibilities of the regional credit control organization, the initial customer account approval, setting and changing credit limits and payment terms, regular monitoring controls, collection effort process, credit insurance procedures, and credit allowances. System controls ensure a credit control assessment is conducted when accepting customers' new orders and before goods are dispatched whenever a customer's credit limit is exceeded due to outstanding or overdue open amounts.

The Group mitigates credit risk through the use of asset-backed securitization programs and factoring facilities (see Note 2.5 "Trade receivables and other current assets").

The Group has also has a credit risk insurance program whereby the majority of its customers with outstanding amounts larger than EUR 70,000 are insured as far as possible.

The Group's credit risk exposure also arises from derivative financial instruments, i.e. foreign exchange derivatives, interest rate derivatives, and commodity derivatives, which are entered into with financial institutions. The Group has foreign exchange and interest rate derivatives with financial institutions acting on an international scale and having sound credit ratings. In case of commodity derivatives, the Group enters into futures transactions deals in the New York and the London terminal markets through its brokers. The mark-to-market exposures in relation to these hedging contracts are regularly and substantially collateralized pursuant to margin agreements in place with such counterparties. Counterparty exposures towards such financial institutions are monitored through limit utilization on a regular basis by the Group's Treasury department and reported to the Group Finance Committee and the AFRQCC.

As of August 31, 2021, the largest customer represents 8% (2020: 8%) whereas the ten biggest customers represent 30% (2020: 29%) of trade receivables. The Group does not have a material credit risk concentration as it maintains a large, geographically diverse customer base. The extent of the Group's credit risk exposure is represented by the aggregate balance of amounts receivable, reduced by the effects of netting arrangements with counterparties. The maximum nominal credit risk exposure in the event all other parties fail to perform their obligation was CHF 1,968.2 million as of August 31, 2021 (2020: CHF 2,182.3 million).

All financial assets measured at amortized cost are first assessed for individual impairment. Subsequently, expected credit loss is calculated by applying the annualized Credit Default Swap rates (CDS) of the country of domicile (pro rated in line with average payment terms; where available, the individual CDS of the counterparty is applied) and a premium of 25 bps per annum. The net expenses representing additions to the allowance for impairment losses and releases of the unused allowance recognized according to the approach described above amounted to CHF 6.6 million in 2020/21 (2019/20: CHF 14.6 million).

The following table summarizes the expected credit losses on the Group's trade receivables at balance sheet date:

# Ageing of trade receivables

	2024	
as of August 31,	2021	2020
in thousands of CHF		
Total trade receivables measured at amortized cost, gross	422,913	336,432
of which:		
insured receivables	255,505	203,957
uninsured receivables with an individual balance over CHF 1 million	77,720	61,516
uninsured receivables with an individual balance below CHF 1 million	89,688	70,959
Less lifetime expected credit losses for trade receivables	(25,084)	(24,969)
Total trade receivables measured at amortized cost (Note 3.7.8)	397,829	311,463
of which:		
not overdue	372,625	287,526
lifetime expected credit losses for trade receivables not overdue	(3,749)	(5,885)
expected credit loss rate	1.01%	2.05%
past due less than 90 days	27,080	31,932
lifetime expected credit losses for trade receivables past due less than 90 days	(3,106)	(4,638)
expected credit loss rate	11.62%	14.52%
past due more than 90 days	23,207	16,974
lifetime expected credit losses for trade receivables past due more than 90 days	(18,228)	(14,446)
expected credit loss rate	78.55%	85.11%
Total trade receivables measured at amortized cost (Note 3.7.8)	397,829	311,463

The Group has insured certain credit risks through a credit insurance policy. The majority of customers with a material outstanding amount are credit insured by this policy.

# Movements in allowance for impairment losses of financial assets

The movements in allowance for impairment losses of financial assets are as follows:

in thousands of CHF	Cash and cash equivalents	Deposits	Trade receivables	Other receivables	Other financial assets	Total

### 3.7.5 Liquidity risk

Liquidity risk arises through a surplus of financial obligations over available financial assets due at any point in time. The Group's liquidity is ensured by means of regular Group-wide monitoring and planning of liquidity coordinated by the Group's Treasury department.

Financing needs are covered through a combination of adequate credit lines with reputable financial institutions as well as through short-term and long-term debt capital market instruments (see Note 3.5 "Financial liabilities").

## Contractual maturities

The table below provides an overview of contractual maturities for financial liabilities and derivatives:

as of August 21, 2021	Cornving amount	In the first year	In the second to	After five years	Contractual
as of August 31, 2021	Carrying amount	in the first year	the fifth year	After five years	amount

No hedge accounting designation					
Commodity price risk	29,750	29,192	143,815	171,735	
Foreign exchange risk	33,702	21,102	62,936	46,926	
Total derivative financial assets	290,642	-	365,984		
Total derivative financial liabilities	-	350,911		528,492	

Derivative financial assets and liabilities consist of hedged items and hedging instruments designated in a cash flow hedging model or a fair value hedging model and derivative financial instruments with no hedge accounting designation.

In the current fiscal year, the Group designated groups of items in a hedge relationship whenever the items are managed together on a net basis for risk management purposes. This resulted in a greater proportion of economic hedges being designated in a fair value hedge as opposed to having no hedge accounting designation.

#### 3.7.7 Offsetting financial assets and financial liabilities

For the financial assets and liabilities subject to enforceable master netting arrangements or similar arrangements above, each agreement between the Group and the counterparty allows for net settlement of the relevant financial assets and liabilities when both elect to settle on a net basis. In the absence of such an election, financial assets and liabilities will be settled on a gross basis. However, each party to the master netting agreement or similar agreement will have the option to settle all such amounts on a net basis in the event of default, insolvency or bankruptcy or following other events predefined in the contract by the counterparty. The cash collateral received and deposited is reported on lines "Trade payables and other current liabilities" and "Trade receivables and other current assets" in the Consolidated Balance Sheet.

# 3.7.8 Fair value of financial instruments

### a) Methods and assumptions

The carrying value of the following financial instruments approximates fair value because

- of the short period to maturity:
- Cash and cash equivalents
- Short-term deposits
- Trade receivables
- · Other receivables representing financial instruments
- Bank overdrafts
- Short-term debt
- Trade payables
- Other payables representing financial instruments
- Lease liabilities

#### Long-term debt

In calculating the fair value of long-term debts, future principal and interest payments are discounted at market interest rates.

#### Derivative financial assets and liabilities

The fair value measurement of some derivatives requires assumptions and management's assessment of certain market parameters. Whenever possible, fair valuation is based on market prices. If required, a valuation model which takes into consideration discounted cash flows, dealer and supplier quotes for similar instruments and recent arm's-length transactions is used. This valuation model takes into account the specific characteristics of the underlying assets or commodities such as the cost of carry, differentials for the properties and technical ratios reflecting production yield.

Ø

Carrying amount and fair value of each class of financial assets and liabilities are presented in the table below:

as of August 31, 2021	Financial assets (mandatorily) measured at fair value through profit or loss	Financial assets measured at amortized cost	Financial liabilities (mandatorily) measured at fair value through profit or loss	Financial liabilities measured at amortized cost	Total carrying amount	Fair value

#### b) Fair value hierarchy of financial instruments

The fair value measurements of financial assets and liabilities are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

- Level 1: The fair value is based on unadjusted, quoted prices in active markets which give the best possible objective indication for the fair value of a financial asset or liability. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker or pricing service, and those prices represent actual and regularly occurring market transactions on an arm's-length basis.
- Level 2: The estimation of the fair value is based on the results of a valuation model. The valuation model for commodity derivatives includes quoted prices in active markets, recent arm's-length transactions or dealer and supplier quotes adjusted for the specific characteristics of the underlying commodities such as the cost of carry, differentials for the properties and conversion yields. Observable market data is used for the valuation of foreign exchange and interest rate derivatives. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.
- Level 3: The valuation models used are based on parameters and assumptions not observable on the market.

The following table summarizes the levels applied with regard to financial assets and financial liabilities measured at fair value:

as of August 31, 2021	Level 1	Level 2	Level 3	Total
in thousands of CHF				
Trade receivables			87,145	87,145
Derivative financial assets	99,692	190,950	-	290,642
Derivative financial liabilities	125,818	225,093	-	350,911
as of August 31, 2020	Level 1	Level 2	Level 3	Total
in thousands of CHF				
Trade receivables			75,941	75,941
Derivative financial assets	193,554	172,430	-	365,984
Derivative financial liabilities	210,634	317,858	-	528,492

As at August 31, 2021, no contracts were irrevocably designated as executory contracts measured at fair value, applying the fair value option, leading to derivative financial assets or derivative financial liabilities (2020: CHF 18.3 million and CHF 40.0 million). The fair value of each executory contract measured at fair value using the fair value option was calculated using the methods described in Level 2.

The Group maintains asset-backed securitization programs for trade receivables, transferring the contractual rights to the cash flow or third-party receivables. These receivables are derecognized. Trade receivables measured at fair value are receivables dedicated to the securitization programs, but not yet remitted to the asset-purchasing company.

The value of the trade receivables measured at fair value was calculated using a discounted cash flow method based on the nominal value and the discount rates (mainly representing the risk-free rate and credit risk of the counterparty) between the Group and the purchasing party.

There have been no transfers between the fair value hierarchy levels during the fiscal years 2020/21 and 2019/20.

#### 3.7.9 Effect of hedge accounting on the financial position and performance

# a) Impact of hedging instruments designated in hedging relationships

The impact of hedging instruments designated in hedging relationships as of August 31, 2021 on the Group's Consolidated Balance Sheet is as follows:

in CHF million	Nominal amount of the hedging instrument	Carrying amount of the he	dging instrument	Fair value changes of the hedging instrument used as a basis to calculate hedge ineffectiveness
as of August 31, 2021		Assets	Liabilities	
Cash flow hedges

c) Impact of the hedging relationships on the Consolidated Income Statement and other comprehensive income

The above hedging relationships affected the Consolidated Income Statement and other comprehensive income as follows:

Cash flow hedges as of August 31, 2021 in CHF million	Change in the fair value of the hedging instrument recognized in other comprehensive income	Hedge ineffectiveness recognized in the Consolidated Income Statement	Amount reclassified from the cash flow hedge reserve to the Consolidated Income Statement	Line item in the Consolidated Income Statement impacted by the reclassification from cash flow hedge reserve
Interest rate risk	3.4	_	2.5	Finance expense
Commodity price risk	14.4	-	(1.2)	Cost of goods sold
Foreign exchange risk	0.5	-	0.9	Cost of goods sold
Cash flow hedges	Change in the fair value of the hedging instrument recognized in other comprehensive income	Hedge ineffectiveness recognized in the Consolidated Income Statement	Amount reclassified from the cash flow hedge reserve to the Consolidated Income Statement	Line item in the Consolidated Income Statement impacted by the reclassification from cash flow hedge reserve
as of August 31, 2020	value of the hedging instrument recognized in other comprehensive	ineffectiveness recognized in the Consolidated	from the cash flow hedge reserve to the Consolidated	in the Consolidated Income Statement impacted by the reclassification from cash flow hedge
	value of the hedging instrument recognized in other comprehensive	ineffectiveness recognized in the Consolidated	from the cash flow hedge reserve to the Consolidated	in the Consolidated Income Statement impacted by the reclassification from cash flow hedge
as of August 31, 2020	value of the hedging instrument recognized in other comprehensive	ineffectiveness recognized in the Consolidated	from the cash flow hedge reserve to the Consolidated	in the Consolidated Income Statement impacted by the reclassification from cash flow hedge
as of August 31, 2020 in CHF million	value of the hedging instrument recognized in other comprehensive income	ineffectiveness recognized in the Consolidated	from the cash flow hedge reserve to the Consolidated Income Statement	in the Consolidated Income Statement impacted by the reclassification from cash flow hedge reserve

This table includes the changes in the fair value of the hedging instruments recognized in Other comprehensive income throughout the entire fiscal years 2020/21 and 2019/20 (including hedge accounting relationships ended during the fiscal year).

The table in section 3.7.9a "Impact of hedging instruments designated in hedging relationships" (refer to column "Fair value changes of the hedging instrument used as a basis to calculate hedge ineffectiveness") includes the fair value changes of hedging instruments that are related to hedge accounting relationships, which were still active as at August 31, 2021.

Fair value hedges       Hedge         ineffectiveness       recognized in         the Consolidated       Income Statement         as of August 31, 2021	Line item in the Consolidated Income Statement where the hedge ineffectiveness is reported
in CHF million	
Commodity price risk 4.2	Cost of goods sold
Foreign exchange risk 0.6	Cost of goods sold
Fair value hedges       Hedge         ineffectiveness       recognized in         the Consolidated       Income Statement	Line item in the Consolidated Income Statement where the hedge ineffectiveness is reported
in CHF million	
Commodity price risk 3.8	Cost of goods sold
Foreign exchange risk 3.8	Cost of goods sold

Certain ineffectiveness can arise during the hedging process. The main sources of hedge ineffectiveness are considered to be timing differences between entering into the hedged items and into the hedging instruments and differences between the maturity profile of the hedged items and the hedging instruments.

The following table provides further information about the effect of cash flow hedges on equity:

Fair value hedging – for commodity price risks and foreign currency exchange risks related to the contract business To reflect the Group's activities of hedging its cocoa price risk exposure embedded in the cocoa and chocolate inventories and unrecognized firm commitments, the Group applies fair value hedge accounting. In this fair value hedge accounting relationship, the chocolate inventories and unrecognized firm sales commitments and the cocoa inventories, unrecognized firm purchase and sales commitments, respectively, are designated as hedged items whereby cocoa bean futures are designated as hedging instruments. When cocoa and chocolate inventory is designated as a hedged item, the subsequent cumulative change in the fair value of the inventory attributable to the hedged cocoa price risk is adjusting the carrying amount of the hedged item (change of inventory cost value) with a corresponding gain or loss in the Consolidated Income Statement.

When unrecognized firm cocoa and chocolate commitments (purchase and sales contracts) are designated as hedged items, the subsequent cumulative change in the fair value of these contracts attributable to the hedged cocoa price risk is recognized as an asset or a liability (reported as "Derivative financial assets" and "Derivative financial liabilities") with a corresponding gain or loss in the Consolidated Income Statement. The hedging instrument is recorded at fair value under "Derivative financial assets" or "Derivative financial liabilities", and the changes in the fair value of the hedging instrument are also recognized in the Consolidated Income Statement.

For foreign currency exchange risks related to firm purchase and sales commitments in certain entities, fair value hedge accounting is applied. The hedge relationship is between the unrecognized firm commitments (hedged items) and the foreign currency forward contracts and/or monetary items (hedging instruments). The changes in fair value of the hedging instruments (attributable to foreign currency exchange rate movements) are recognized in the Consolidated Income Statement. The cumulative change in the fair value of the hedged items (unrecognized firm commitments) attributable to the foreign currency risk is recognized as "Derivative financial assets" or "Derivative financial liabilities" with a corresponding gain or loss in the Consolidated Income Statement.

Accounting for cash flow hedges

For each cash flow hedge relationship, the effective part of any gain or loss on the derivative financial instrument is recognized directly in other comprehensive income. Gains or losses that are recognized in other comprehensive income are transferred to the Consolidated Income Statement in the same period in which the hedged exposure affects the Consolidated Income Statement. The ineffective part of any gain or loss is recognized immediately in the Consolidated Income Statement at the time hedge effectiveness is tested.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated or exercised, or no longer qualifies for hedge accounting. At that point in time, any cumulative gain or loss on the hedging instrument recognized in other comprehensive income is kept in other comprehensive income until the forecasted transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognized in other comprehensive income is immediately transferred to the Consolidated Income Statement.

Cash flow hedging – for commodity price risks (cocoa and sugar price risk) and	The Group enters into sugar futures to hedge the sugar price risk exposure embedded in certain forecasted sugar purchases, and into foreign exchange forwards and futures contracts to hedge the currency risk arising from these forecasted sugar purchases.
foreign currency exchange risks arising from forecasted purchase and sales transactions	The Group applies cash flow hedge accounting for these hedging relationships whereby the sugar futures and the foreign exchange forwards and futures are designated as hedging instruments to hedge the variability in cash flows attributable to the risk of sugar price movements and to the foreign currency risk, respectively, in the hedged forecasted sugar purchases.
	Where no firm commitments exist, the Group may enter into cocoa bean futures to hedge the cocoa price risk arising from forecasted sales, and into foreign exchange forwards and futures contracts to hedge the currency risk arising from forecasted sales transactions denominated in foreign currencies.
	The related entities apply cash flow hedge accounting whereby the cocoa bean futures and the foreign exchange forwards and futures are designated as hedging instruments to the underlying forecasted sales to hedge the variability in cash flow that is attributable to the risk of cocoa price movements and to the foreign exchange risk, respectively.
Cash flow hedging – for interest rate risks	The Group applies cash flow hedge accounting for interest rate derivatives, converting a portion of floating rate borrowings to fixed-rate borrowings.
Cash flow hedging – for logistical expenditure (fuel oil)	The Group also enters into fuel oil swaps to hedge its exposure to fuel oil price movements in its forecasted freight expenditures, and it applies cash flow hedge accounting for this hedging relationship.
No hedge accounting designation	The Group's purchasing and sourcing centers and the Group's Treasury department have derivative financial instruments that are measured at fair value without being assigned to a hedge accounting relationship.

#### 3.8 Financial result

#### Composition of finance income

in thousands of CHF	2020/21	2019/20
Interest income	3,640	6,697
Share of result of equity-accounted investees, net of tax	(59)	282
Foreign exchange gains, net	47	-
Total finance income	3,628	6,978

#### Composition of finance expense

in thousands of CHF	2020/21	2019/20
	·	
Interest expense	(88,766)	(94,664)
Amortization of structuring fees	(2,958)	(2,538)
Charges on undrawn portion of committed credit facilities	(2,381)	(1,337)
Net interest costs related to defined benefit plans (Note 4.2)	(3,119)	(3,495)
Total interest expense	(97,224)	(102,034)
Bank charges and other financial expense	(4,286)	(3,763)
Foreign exchange losses, net	-	(1,158)
Loss on derivative financial instruments	(3,787)	(2,471)
Total finance expense	(105,297)	(109,425)

Interest expenses include among other the cost of leasing, the cost of interest rate swaps resulting from paying fixed interest rates in exchange for receiving floating interest rates. All interest rate derivative financial instruments are in a cash flow hedge relationship where the effective portion of the changes in fair value are recognized in Other comprehensive income.

Structuring fees are mainly attributable to the amortization of fees capitalized for the EUR 1,000 million Revolving Credit Facility (as amended and extended from time to time), the USD 400 million Senior Note, issued June 2013, the EUR 450 million Senior Note, issued May 2016, the EUR 467 million and CHF 152 million equivalent Schuldscheindarlehen, issued February 2019, the EUR 60 million private placement, issued May 2020, and the EUR 377 million and CHF 20 million equivalent Schuldscheindarlehen, issued July 2020.

The foreign exchange gains are mainly attributable to price volatility in the global foreign currency markets.

# 4.2 Employee benefits

#### Post-employment and other long-term employee benefits

The Group operates a number of independent defined benefit plans and other postretirement or long-term benefit plans, in line with local legal and tax requirements.

The largest defined benefit pension plans (funded) are located in Switzerland, Belgium, the US and the UK. Together, these plans represent 95% (2019/20: 95%) of the Group's total gross defined benefit pension liabilities and 98% (2019/20: 98%) of the Group's total plan assets.

The amounts recognized in the Consolidated Balance Sheet are as follows:

The Group expects to pay CHF 17.0 million in employer contributions to defined pension plans in the next fiscal year (2020/21: CHF 23.0 million).

Actuarial losses amounted to CHF 5.0 million for the current fiscal year (2019/20: actuarial gains of CHF 25.7 million), which is mainly related to changes in the financial assumptions such as the development of discount rates. The respective amounts were recognized in Other comprehensive income.

The movement in the fair value of plan assets is as follows:

	2020/21	2019/20
in thousands of CHF	Defined benefit per	ision plans
Opening fair value of plan assets as of September 1,	258,819	251,170
Currency translations	(30)	75
Interest income	1,938	1,751
Gains/(losses) on curtailment	-	1
Total recognized in income statement	1,908	1,827

# Notes to the Consolidated Financial Statements

# Actuarial assumptions

Weighted average actuarial assumptions used are as follows:

	2020/21	2019/20	2020/21	2019/20
	Defined benefit pension plans		Other long-term benefit plans	
Discount rate	1.7%	1.7%	2.8%	2.6%
Expected rate of pension increase	0.6%	0.0%	0.0%	0.0%
Expected rate of salary increase	2.4%	1.5%	2.3%	1.3%

The applicable mortality tables in the Group's largest defined benefit plans and underlying longevity assumptions are summarized in the following table:

	Mortality table	2021	2020	2021	2020	
			Life expectancy at age 65 for a male member		Life expectancy at age 65 for a female member	
Switzerland	LPP 2020 (2020: LPP2015)	22	22	24	24	
Belgium	MR / FR	21	21	25	25	
UK	S3NMA / S3NFA	22	22	25	25	
US	PRI-2012	21	21	22	23	

## Sensitivity analysis

Reasonable and possible changes at the reporting date to one of the relevant actuarial assumptions, with all other assumptions held constant, would have affected the defined benefit liabilities by the amounts shown below:

as of August 31,	2021	2020	2021	2020	
in thousands of CHF Increase		se	Decrease		
Discount rate (1% movement)	(56,670)	(74,480)	73,412	74,480	
Expected rate of pension increase (1% movement)	21,956	23,842	(21,956)	(23,842)	
Expected rate of salary increase (1% movement)	27,717	26,971	(27,717)	(26,971)	
Life expectancy at age 65 (1 year)	9,187	9,096	(9,187)	(9,096)	

#### Description of the defined benefit plans

The characteristics of the most significant defined benefit pension plans of the Group are further described as follows:

#### Defined benefit plans Switzerland

The retirement benefit plans for all Swiss Group entities are mainly defined benefit plans where contributions are expressed as a percentage of the insured actual salary. The employer is affiliated to a collective foundation with reinsurance of actuarial risks arising from the plan with an insurance company. Members benefit from a guaranteed minimum interest on accrued savings and conversion rates at retirement in accordance with the Swiss Federal Law on Occupational Retirement, Survivors' and Disability Pension Plans (BVG). This law defines the minimum pensionable salary and the minimum retirement credits. In addition to retirement benefits, the Swiss retirement benefit plans also provide for temporary partial or total disability benefits as well as for pre-retirement death benefits including widows' and orphans' benefits.

The benefit plans are outsourced to external insurance companies, which are responsible for the operation of the plan including the allocation of plan assets. The governance and the supervision as well as the responsibility to make changes in the plan lie with a Board of Trustees. It consists equally of employer and employee nominated representatives.

The applicable regulation requires the retirement benefit plans of all Swiss Group entities to be funded on the basis of employer and employee contributions, including risk premiums and savings contributions. In case of underfunding, recovery measures must be taken, such as the additional financing from the employer or from the employer and employees, or the reduction of benefits or a combination of both.

The plan regulations in Switzerland were partially modified and certain components of the Swiss pension plans that meet the specific requirements are accounted for as defined contribution plans.

#### Defined benefit plans - Other countries

In the US, the Group maintains a retirement benefit plan only for pensioners and deferred pensioners related to a discontinued operation. Effective July 31, 2005, all benefits in the plan were closed for new entrances and further benefit accruals. The pension plan's funding is governed by ERISA and the applicable laws and regulations under Internal Revenue Code (IRC) sections 404, 412, and 430. Barry Callebaut is the plan sponsor and usually funds the minimum required contribution based on these regulations. The investment management is outsourced to investment management companies and the plan is governed by a Board of Trustees.

In Belgium, the Group operates defined benefit plans for events of retirement, temporary and permanent disability and death in service put in place by the employer in addition to legal retirement plans. These are company collective plans introduced on July 1, 1993. The retirement benefit plans are funded by a combination of employer and employee contributions as regulated by the Belgian Pension Act. The contributions are expressed as a percentage of the insured actual salary. The plans are fully insured. The funding of the defined benefit plans are externalized to an insurance company who is responsible for the operation of the plan including the allocation of plan assets. The governance and the supervision as well as the responsibility to make changes in the plan lie with a Board of Trustees. The legislation requires a minimum funding level. In the situation where the plan assets are not sufficient, the employer has to pay an additional contribution to the collective financing fund.

In the UK, the Group operates a defined benefit retirement scheme in which members receive benefits based on the final salary with the contributions paid by the employer on a balance of cost basis. Effective January 31, 2014, all benefits in the plan were closed for new entrances and further benefit accruals. The plan is run by the Board of Trustees in accordance with the Trust Deed & Rules and legislation. The Trustees are required by law to fund the plan on prudent funding assumptions under the Trust Deed & Rules of the plan. The contributions payable by the Company to fund the plan are set by the Trustees after consulting the Company. The investment management is outsourced to investment management companies.

#### Share-based payments

Share awards are granted to participants according to individual contracts and the current employee stock ownership program.

#### Long-Term Incentive Plan (LTIP)

The purpose of the LTIP is to provide the participants with an ownership interest in Barry Callebaut and to reward them for the long-term performance of the company. The LTIP thus aligns their interests to those of the shareholders.

The current LTIP has been in place since fiscal year 2016/17 and has been amended for the fiscal year 2018/19, where members of the Executive Committee were granted a fourth exceptional tranche, which vests subject to a four-year cliff vesting based on outperforming the Mid-Term Plan targets in terms of volume growth (CAGR; 25%), EBIT (25%), cumulative Free cash flow (25%) and Return on invested capital (ROIC) (25%) for the period September 2018 to August 2022. The maximum payout opportunity for this tranche is 100% of target. For the fiscal year 2020/21, there is no such additional tranche.

The grant of share units under the LTIP is based on a target LTI amount determined individually for each plan participant. The individual LTI amount is divided by the average share price of the last three months of the preceding fiscal year in order to calculate the number of share units awarded. The share units vest in three tranches over three fiscal years, i.e. 25% on the first, 25% on the second and 50% on the third anniversary of the grant date.

The first two tranches are restricted share units (RSU) that vest subject to the LTIP participant continuing to be employed by Barry Callebaut.

The third tranche consists of performance share units (PSU) that vest subject to meeting two performance criteria over the three-year vesting period.

The first performance criterion, accounting for 50% of the respective PSU grant, is the relative share price development of Barry Callebaut versus a peer group of companies in the chocolate, ingredients and FMCG sector: AAK, Fuji Oil, Givaudan, Hershey, Kellogg's, Kerry, Lindt, Mondelez, Nestlé, Olam and Unilever. The objective (100% vesting) is to achieve median performance, e.g. to outperform half of the peer companies. There is no vesting for a performance below the first quartile of the peer group (threshold), and the vesting is capped at 300% for delivering the best performance in the peer group.

The second performance criterion, accounting for 50% of the relevant PSU grant, is ROIC. The ROIC performance was introduced in fiscal year 2016/17 in order to reward the sustainable management of the Company's assets. The three-year ROIC target was set by the Board of Directors on the basis of the long-term strategic plan of the Company. The vesting also ranges from 0% to 300% of target. Consequently, the overall vesting of the LTI award (including RSU and PSU) ranges from 50% and 200% of the initially determined number of share units granted.

The Board of Directors reserves the right to suspend or adjust the vesting of the share units in case of a negative result from continuous operations of the Barry Callebaut Group. Once the shares are vested and transferred, they are free of any sales restrictions. Any award granted under the LTIP is subject to clawback and malus provisions. In case of a material misstatement of financial results or a serious reputational damage to Barry Callebaut due to fraud of willful intent, or of a gross misconduct which would qualify as a cause for termination, the Board of Directors may forfeit or claim back vested or unvested share units, within a period of two years after the vesting of the award.

The overall vesting of the LTI award (including RSU, PSU and the fourth exceptional tranche) ranges from 50% to 200% of the initially determined number of the share units granted for members of the Executive Committee.

The share awards granted entitle the participants to full shareholders rights upon vesting of the share units (RSU/PSU) and their conversion into shares. In case of resignation or dismissal for cause during the vesting period (which ranges between one and three years), the initially granted, but not yet vested share units are forfeited.

The fair value of the RSU granted (no performance condition) is estimated by taking the market price at grant date less the present value of the expected dividends that will not be received on these RSU during the vesting period. 2,913 share awards were granted in fiscal year 2020/21 with an average fair value of CHF 1,964 (in fiscal year 2019/20: 2,726 share awards with an average fair value of CHF 1,982).

The fair value of the PSU, of which the vesting is conditional upon the relative share price performance, is assessed as per grant date based on a valuation performed by external experts applying the "Monte Carlo simulation" method. The most relevant parameters relating to Barry Callebaut and the relevant peer group are the risk-free interest rate, annualized volatility, the share price and the dividend yields. The risk-free rates reflect three-year government bonds of the country of origin of the respective company and range from –0.8% to 1.0%. The volatilities and correlations are based on daily returns of a company's share at its respective exchange of origin over a three-year period preceding the start of the vesting cycle (the annualized volatility for Barry Callebaut and its peer group ranges from 17.2% to 29.3%). The dividend yields are based on dividends paid over a three-year period preceding the start of the vesting cycle and range from 0.7% to 4.0%. The share prices are denominated in their respective currency and retrieved for the specified point in time. The base share price taken into account for Barry Callebaut is the share price at grant date and amounted to CHF 2,000.

The fair value of PSU, of which the vesting is conditional upon the Group's ROIC performance, is taken at fair value of the Barry Callebaut share at grant date discounted for dividends until the vesting. As this part is based on the Group's performance relating to ROIC, the relative value is adjusted periodically during the vesting period, based on an estimation of the ROIC performance at vesting date.

In fiscal year 2020/21, 1,626 PSU were granted to members of the ExCo with an average fair value of CHF 2,431 (in fiscal year 2019/20: 1,494 share awards with an average fair value of CHF 2,366). To the other plan participants, 1,116 share awards with an average fair value of CHF 2,431 per share were granted in fiscal year 2020/21 (in fiscal year 2019/20: 1,219 share awards with an average fair value of CHF 2,366).

#### Board of Directors

The Board of Directors receives share awards annually for the respective service period. These share awards are not part of the share plans described above and are determined by the NCC as a fixed number of shares. The total number of shares awarded for the service period amounted to 1,266 with an average fair value of CHF 1,930 per share (2019/20: 1,830 share awards with an average fair value of CHF 1,999 per share).

### Recognition in financial statements

The fair value of the share awards at grant date is recognized over the vesting period as a personnel expense under either of these share plans. For 2020/21, the amount thus recognized (before taxes) was CHF 16.0 million with a corresponding increase in equity (2019/20: CHF 12.5 million). Of the amount recognized in 2020/21, CHF 13.3 million related to the LTIP (2019/20: CHF 8.9 million) and CHF 2.7 million to the BoD plan (2019/20: CHF 3.6 million).

#### **Accounting policies**

Employee benefit liabilities/post- employment	The Group operates a number of independently defined benefit plans and other post-retirement or long-term benefit plans, which conform to local legal and tax requirements.
benefits	The Group's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, applying the discount rate and deducting the fair value of any plan assets.
	The calculation of defined benefit liabilities is performed annually by qualified actuaries using the projected unit credit method. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.
	Remeasurement of the net defined benefit liability which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling are recognized immediately in Other comprehensive income. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.
	When the benefits of a plan are changed, or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Group recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.
	The Group's employee benefit schemes are exposed to changes in legislation and to investment return and matching risks, longevity risks and solvency risks. These risks may all require additional contributions and are therefore reviewed on a regular basis by the companies' management or by the relevant Board of Trustees as follows:
	<ul> <li>Changes in legislation: monitoring of country-specific legislation changes</li> <li>Investment return risk: analysis and optimization of the allocation and performance of assets as well as monitoring of compliance with investment guidelines.</li> </ul>
	<ul> <li>investment guidelines</li> <li>Investment matching risk: analysis and optimization of asset-liability matching and periodic fair valuation of assets and liabilities</li> <li>Longevity risk: analysis of mortality assumptions and monitoring of demographic development</li> <li>Conservice mentions and monitoring of astronomic development</li> </ul>

• Solvency risk: monitoring of solvency of external solution providers

Defined contribution plans	Obligations for contributions to defined contribution plans are expensed as the related service is provided. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in future payments is available. The Group has no further payment obligations once the contributions have been paid.
Post-employment benefits other than pensions	Certain subsidiaries provide health care and insurance benefits for a portion of their retired employees and their eligible dependents. The cost of these benefits is actuarially determined and included in the related function expenses over the employees' working lives. The related liability is also included in the position "Other long-term benefit plans".
Other long-term employee benefits	Other long-term employee benefits represent amounts due to employees under deferred compensation arrangements mandated by certain jurisdictions in which the Group conducts its operations (including jubilee plans and other long-service award plans). That benefit is discounted to determine its present value. Related remeasurement costs are recognized in the Consolidated Income Statement. The related liability is included in the position "Other long-term benefit plans".
Termination benefits	Termination benefits are expensed at the earlier of when the Group can no longer withdraw the offer of those benefits or when the Group recognizes costs for restructuring.
Long-Term Incentive Plan	For the LTIP, Barry Callebaut AG shares are purchased on the market and passed on to satisfy the awards. In accordance with IFRS 2, the compensation costs relating to share awards granted under this deferred share plan are recognized in the Consolidated Income Statement over the vesting period at their fair value as at the grant date.

# **5 Group Structure and Related Parties**

# 5.1 Acquisitions

#### Acquisitions in 2020/21

There were no acquisitions completed in fiscal year 2020/21.

#### Acquisitions in 2019/20

#### GKC Foods

On July 1, 2020, the Group acquired GKC Foods (Australia) Pty Ltd, a producer of chocolate, coatings and fillings, serving many consumer chocolate brands in Australia and New Zealand. GKC is based in Melbourne, Australia.

This strategic acquisition established Barry Callebaut's direct presence and manufacturing capacity in the growing Australian market, empowered the Group to expand its position in the industrial chocolate market and to leverage its value-adding Gourmet & Specialties business in the new market.

Barry Callebaut's investment involved upgrading and expanding the factory's existing infrastructure. GKC employed around 50 people at the site, including pre-existing employees, who transferred to Barry Callebaut.

The preliminary fair value of the purchase consideration amounted to CHF 3.4 million; CHF 2.8 million was fully paid in cash, the remaining CHF 0.6 million was recognized as "Other payables" and paid in October 2020 upon finalizing the completion statement. The acquisition-related costs in the amount of CHF 0.2 million were expensed and included in "Other expenses" in fiscal year 2019/20. The agreement with the seller did not contain arrangements for contingent considerations.

The purchase price allocation resulted in net identifiable assets of CHF 3.3 million, resulting in a goodwill of CHF 0.1 million. Identifiable net assets consisted mainly of CHF 4.0 million of right-of-use assets and a respective lease liability and CHF 3.0 million of property, plant and equipment.

Since July 1, 2020, the acquired business contributed CHF 0.3 million to revenues from sales and services and a CHF 0.4 million loss to net profit for the fiscal year 2019/20. Had it been consolidated from September 1, 2019, it would have contributed revenues from sales and services of CHF 3.1 million and a loss to net profit of CHF 0.5 million in the Consolidated Income Statement for the fiscal year 2019/20.

#### 5.2 Discontinued operations and disposal

The Group did not have any discontinued operations or disposals in 2020/21 and 2019/20.

# 5.3 Group entities

Barry Callebaut Comextra Indonesia.

# Accounting policies

Scope of consolidation/ subsidiaries	The Consolidated Financial Statements of the Group include all the assets, liabilities, income and expenses of Barry Callebaut AG and the companies which it controls. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Non-controlling interests are shown as a component of equity in the balance sheet, and the share of the net profit attributable to non- controlling interests is shown as a component of the net profit for the year in the Consolidated Income Statement. Newly acquired companies are consolidated from the date control is transferred (the effective date of acquisition), using the acquisition method. Subsidiaries disposed of are included up to the effective date of disposal.
	All intragroup balances and unrealized gains and losses or income and expenses arising from intragroup transactions are eliminated in preparing the Consolidated Financial Statements. Unrealized gains arising from transactions with associates and jointly controlled entities are eliminated to the extent of the Group's interest in the entity. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment.

#### 5.4 Significant shareholders and related parties

#### Significant shareholders

The following shareholders hold a participation of more than 3% of the issued share capital of the Group's ultimate parent Barry Callebaut AG:

as of August 31,	2021	2020
Jacobs Holding AG	30.1%	40.1%
Renata Jacobs	5.0%	
BlackRock, Inc. <sup>1</sup>	3.1%	3.1%

1 Based on notifications through the electronic publication platform of the SIX Swiss Exchange.

#### **Related parties**

Significant transactions and balances between the Group and related parties are as follows:

Nature of cost/revenue	2020/21	2019/20
	(250)	(250)
Management services	(250)	(250)
	2020/21	2019/20
	2020/21	2019/20
	63	117
		(250)           Management services         (250)           2020/21         2020/21

#### Compensation of key management personnel

The key management personnel is defined as the Board of Directors and the Executive Committee. Key management compensation consists of the following:

in million CHF	2020/21	2019/20
Short-term employee benefits	15.6	14.6
Post-employment benefits	2.3	2.4
Share-based payments	10.2	9.6
Total	28.1	26.6

Further details related to the requirements of the Swiss Transparency law (Art. 663b<sup>bis</sup> and 663c Swiss Code of Obligations) are disclosed in Notes 2.8, 3.4 and 3.5 in the Financial Statements of Barry Callebaut AG and in the Remuneration Report.

## 6 Taxes

#### 6.1 Income taxes

#### Income tax expense

in thousands of CHF	2020/21	2019/20
Current income tax expenses	(76,250)	(72,161)
Deferred income tax expenses	(4,264)	2,950
Total income tax expenses	(80,514)	(69,211)

#### Reconciliation of income taxes

Prior-period-related items	(11,788)	193
Changes in tax rates	1,549	(2)
Losses carried forward not yet recognized as deferred tax assets	(6,711)	(28,261)
Tax relief on losses carried forward formerly not recognized as deferred tax assets	6,009	2,863
Total income taxes	(80,514)	(69,211)

For the reconciliation above the weighted average applicable tax rate was 21.3% in 2020/21 (2019/20: 18.4 %).

The weighted average applicable tax rate has, year-on-year, increased mainly due to changes in the country mix of profit before taxes, that was significantly impacted by COVID-19 in the prior fiscal year, and to a lesser extent by modified corporate tax rates in certain tax jurisdictions. The prior-year income tax expense of CHF 69.2 million includes a one-off, cash-neutral tax expense of CHF 1.0 million resulting from the Swiss tax reform, related to the revaluation of the deferred tax assets and liabilities to the newly enacted cantonal tax rates which became effective as of January 1, 2020. The application of the Swiss tax reform has resulted in the recognition of a deferred tax income of CHF 12.8 million in 2020/21 (2019/20: CHF 9.4 million).

The Group's effective tax rate in 2020/21 is 17.3% (2019/20: 17.9% excluding the one-off deferred tax impact related to the Swiss tax reform).

The tax relief on losses carried forward previously not recognized as deferred tax assets of CHF 6.0 million (2019/20: CHF 2.9 million) consists of CHF 5.9 million tax relief of utilization on tax losses carried forward previously not recognized (2019/20: CHF 2.9 million) and CHF 0.1 million of tax losses recognized for the first time in 2020/21 (2019/20: CHF 0.0 million).

#### 6.2 Deferred tax assets and liabilities

#### Movement in deferred tax assets and liabilities

	Inventories	Property, plant, equipment/ intangible assets	Other assets	Provisions	Other liabilities	Tax loss carry- forwards	Total

as of August 31, 2021	2,731	(139,292)	52,305	(790)	40,922	34,998	(9,126)

For fiscal year 2020/21, deferred tax expense recognized in other comprehensive income amounted to CHF 7.9 million (2019/20: deferred tax expense CHF 4.7 million), and this relates to remeasurement of defined benefit plans of CHF 2.7 million (2019/20: deferred tax expense of CHF 1.9 million) and to cash flow hedging reserves CHF 5.2 million (2019/20: deferred tax expense of CHF 2.8 million).

#### Recognized deferred tax assets and liabilities

The recognized deferred tax assets and liabilities, without setoff of balances within the same tax jurisdiction, are attributable to the following:

as of August 31,		2021			2020	
in thousands of CHF	Assets	Liabilities	Net	Assets	Liabilities	Net
Inventories	14,003	(11,272)	2,731	19,289	(10,257)	9,032
Property, plant and equipment/intangible assets	9,799	(149,091)	(139,292)	13,835	(108,133)	(94,298)
Other assets	58,585	(6,280)	52,305	41,738	(10,809)	30,929
Provisions	1,072	(1,862)	(790)	540	(2,040)	(1,500)
Other liabilities	67,119	(26,197)	40,922	48,135	(13,846)	34,289
Tax losses carried forward	34,998	-	34,998	25,095		25,095
Tax assets/(liabilities)	185,576	(194,702)	(9,126)	148,632	(145,085)	3,547
Setoff within same tax jurisdiction	(108,404)	108,404	-	(65,086)	65,086	-
Reflected in the balance sheet	77,172	(86,298)	(9,126)	83,546	(79,999)	3,547

For fiscal year 2020/21, deferred tax assets amounting to CHF 0.0 million (2019/20: CHF 11.5 million) were recognized that are depending on future taxable profits in excess of existing taxable temporary differences for entities which suffered fiscal losses in the current period. Such fiscal losses in prior fiscal year 2019/20 were fully resulting from the economic impact of the COVID-19 crisis and did not recur in fiscal year 2020/21.

## Tax losses carried forward excluded from recognition of related deferred

#### tax assets

Tax losses carried forward not recognized as deferred tax assets have the following expiry dates:

as of August 31,	2021	2020
in thousands of CHF		
Expiry:		
Within 1 year	51	683
After 1 up to 2 years	1,020	114
After 2 up to 3 years	1,039	1,095
After 3 up to 10 years	11,120	6,733
After 10 years	305	241
Unlimited	376,287	406,955
Total unrecognized tax losses carried forward	389,822	415,821

Tax losses carried forward utilized during the year 2020/21 were CHF 38.7 million (2019/20: CHF 41.0 million). The related tax relief amounted to CHF 10.5 million, of which CHF 4.6 million were already recognized as a deferred tax asset in the previous year (2019/20: CHF 7.3 million of which CHF 4.4 million were already recognized as a deferred tax asset in the previous year) and CHF 5.9 million that were previously not recognized (2019/20: CHF 2.9 million).

As at August 31, 2021, the Group had unutilized tax losses carried forward of approximately CHF 531.1 million (2019/20: approximately CHF 516.7 million) available for offset against future taxable income.

Of the total tax losses carried forward, an amount of CHF 141.2 million has been recognized for deferred taxation purposes resulting in a deferred tax asset of CHF 35.0 million (2019/20: CHF 100.9 million recognized resulting in a deferred tax asset of CHF 25.1 million). The net increase of CHF 9.9 million in the deferred tax asset on recognized tax losses carried forward consists of CHF 13.7 million recognition of current year tax losses carried forward, CHF 4.6 million decrease resulting from utilization of tax losses already recognized as a deferred tax asset in prior year, CHF 0.0 million increase due to tax rate changes and CHF 0.8 million increase relating to currency translation adjustments.

#### Accounting policies

Taxes

Current income taxes are recognized based on taxable income, whereas other taxes such as non-recoverable taxes withheld on management fees and royalties received or paid are reported under "Other expenses". Non-recoverable withholding taxes are only accrued if distribution by subsidiary companies is foreseen.

Income taxes are calculated in accordance with the tax regulations in effect in each country.

Current and deferred tax liabilities and assets for uncertain tax positions according to IFRIC 23 are considered based on the probability of the related uncertain tax positions and measured based on the single most probable outcome or the weighted average expected outcome of the uncertain tax positions.

The Group determines the expected income tax rate by weighing the applicable tax rates in the jurisdictions concerned based on the profit before taxes per jurisdiction.

The applicable expected tax rate per company is the domestic corporate income tax rate applicable to the profit before taxes of the company for the respective fiscal year.

Deferred income taxes are recognized using the balance sheet liability method. Deferred income tax applies to all temporary differences arising between the tax values of assets and liabilities and their values in the Consolidated Financial Statements.

The recoverability of deferred tax assets is assessed based on the availability of sufficient fiscal profitability in the future to absorb the future tax deduction of the related temporary differences or the related tax losses carried forward.

Deferred tax liabilities related to the investments in subsidiaries and joint ventures are not recognized to the extent the Group is able to control the timing of the reversal of these temporary differences and it is probable that these temporary differences will not reverse in the foreseeable future.

## **7 Other Disclosures**

#### 7.1 Other accounting policies

#### Foreign currency transactions

The functional currency of the Group's entities is the currency of their primary economic environment. In individual companies, transactions in foreign currencies are recorded at the rate of exchange at the date of transaction.

Monetary assets and liabilities denominated in foreign currencies are translated into respective functional currencies at the exchange rate prevailing at the reporting date. Any resulting exchange gains and losses are taken to the income statement. If related to commercial transactions or to the measurement of financial instruments in coverage of commercial transactions, such foreign currency gains and losses are classified as Cost of goods sold. Otherwise, foreign currency gains and losses are classified as Finance income and Finance expense.

#### Foreign currency translation

For consolidation purposes, assets and liabilities of subsidiaries reporting in currencies other than Swiss francs are translated to Swiss francs at reporting date rates of exchange. Income statement and cash flow statement are translated at the average rates of exchange for the period. Differences arising from the translation of financial statements using the above method are recorded as cumulative translation adjustments in other comprehensive income. When a foreign operation is disposed of, such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve is reclassified to the Consolidated Income Statement as part of the gain or loss on disposal.

#### Major foreign exchange rates

	2020	2020/21		9/20
	Closing rate	Average rate	Closing rate	Average rate
BRL	0.1766	0.1699	0.1659	0.2077
EUR	1.0814	1.0861	1.0755	1.0753
GBP	1.2616	1.2377	1.2056	1.2265
MXN	0.0456	0.0446	0.0413	0.0464
RUB	0.0125	0.0121	0.0122	0.0142
USD	0.9170	0.9087	0.9038	0.9656
XOF/XAF (unit 1,000)	1.6486	1.6557	1.6396	1.6393

#### **Government grants**

Provided there is reasonable assurance that they will be irrevocably received, grants relating to capital expenditure are deducted from the cost of property, plant and equipment and thus recognized in the Consolidated Income Statement on a straight-line basis over the useful life of the asset.

Other grants that compensate the Group for expenses incurred are deferred and recognized in the Consolidated Income Statement over the period necessary to match them with the costs they are intended to compensate.

#### 7.2 Subsequent events

#### ECC Group acquisition

On June 24, 2021, Barry Callebaut announced the acquisition of two related companies, Europe Chocolate Company NV (ECC), a privately owned manufacturer of chocolate specialties and decorations and Flanders Quality Machines NV (FQM), a privately owned manufacturer of machinery for chocolate specialties and decorations. The companies began manufacturing specialty chocolate ingredients in 1993. They collectively operated a chocolate factory and a warehouse in Malle, Belgium, and employed about 70 people. The transaction, subject to several closing conditions, was successfully closed on September 1, 2021, and the Group acquired 100% of outstanding shares of the two companies.

This strategic acquisition expanded the Group's value-adding specialties capabilities, allowing Barry Callebaut to cater to the increasing demand of Food Manufacturers for highly customized specialty chocolate and decorations and expanded its specialized chocolate molding capabilities by allowing the Group to offer tailor-made solutions thanks to the advanced in-house developed technology.

The purchase consideration was composed of an upfront payment and deferred consideration based on the achievement of performance conditions. The upfront payment of CHF 22.4 million was paid on September 1, 2021 and is subject to customary purchase price adjustments. The acquisition-related costs amount to CHF 0.2 million, were expensed in current fiscal year and included in "Other expenses".

The purchase price allocation could not be completed nor could a reasonable estimate be made since the final measurement of the assets and liabilities is still in progress.

# Statutory Auditor's Report

To the General Meeting of Barry Callebaut AG, Zurich

## **Report on the Audit of the Consolidated Financial Statements**

#### Opinion

We have audited the consolidated financial statements of Barry Callebaut AG and its subsidiaries (the Group), which comprise the consolidated balance sheet as at 31 August 2021 and the consolidated income statement, statement of comprehensive income, consolidated statement of changes in equity and consolidated cash flows statement for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion the accompanying consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 August 2021, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) and comply with Swiss law.

#### **Basis for Opinion**

We conducted our audit in accordance with Swiss law, International Standards on Auditing (ISAs) and Swiss Auditing Standards. Our responsibilities under those provisions and standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession, as well as the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Key Audit Matters** 

Valuation of Inventory

**Derivative Financial Instruments and Hedge Accounting** 

#### Valuation of Goodwill

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### **Key Audit Matter**

Inventory forms a significant part of the Group's assets, amounting to CHF 2,043.3 million as of 31 August 2021.

Inventory consists of physical items and is managed globally by using own capacities, third party warehouses and logistics services providers.

Inventory is measured at the lower of cost and net realisable value, except for inventory that qualifies as the hedged item in a fair value hedge relationship (cocoa and non-cocoa commodities, semi-finished and finished products). These inventories are measured at cost, adjusted for the hedging gain or loss on the hedged item.

We focused on this area because of its size, the assumptions used in the valuation, volatility of raw material prices and the complexity of the supply chain, which are relevant when determining the amounts recorded, including the elimination of unrealized profits on inventory.

#### Our response

We have, amongst others, performed the following audit procedures:

- Obtaining an understanding over the supply chain and testing selected key controls over the recognition and measurement of inventory;
- Testing on a sample basis the accuracy of cost for inventory by verifying purchase prices and actual production costs, and testing the net realisable value by comparing actual cost with relevant market data;
- Testing on a sample basis the application and accuracy of hedge accounting and the underlying fair values;
- Evaluating the adequacy of the intercompany profit elimination on inventory and related derivative financial instruments by assessing the methodology applied based on our knowledge and understanding of the Group;
- Testing the model and recalculating the amounts used in determining the amounts of unrealised profits to be eliminated from inventory and related derivative financial instruments.

For further information on Inventory refer to the following:

Notes to the Consolidated Financial Statements – 2.4 Inventories (page 74)

#### **Derivative Financial Instruments and Hedge Accounting**

#### **Key Audit Matter**

The Group reports derivative financial assets at fair value of CHF 290.6 million and derivative financial liabilities at fair value of CHF 350.9 million as of 31 August 2021.

Derivative financial instruments are used to manage and hedge commodity price risks, foreign currency exchange risks and interest rate risks. These instruments are typically designated in a fair value or cash flow hedge relationship. Financial instruments that are not designated in a hedging relationship and where no hedge accounting is applied are measured at fair value.

The fair value of the derivative financial instruments is based on quoted prices in active markets or on valuation models using observable input data.

We focused on this area because of the number of contracts and the complexity related to their measurement and related to hedge accounting.

#### Our response

We have performed, amongst other audit procedures, the following test work:

- Obtaining an understanding of the risk management policies and testing key controls for the use, the recognition and the measurement of derivative financial instruments;
- Reconciling derivative financial instruments data to third party confirmations;
- Comparing input data used in the Group's valuation models to independent sources and externally available market data;
- Comparing valuation of derivative financial instruments with market data or results from alternative, independent valuation models;
- Testing on a sample basis the application and accuracy of hedge accounting;
- Considering the appropriateness of disclosures in relation to financial risk management, derivative financial instruments and hedge accounting.

For our audit procedures in connection with eliminating unrealised profits on inventory and related derivative financial instruments, we refer to the Key Audit Matter "Valuation of Inventory".

For further information on Derivative Financial Instruments and Hedge Accounting refer to the following:

— Notes to the Consolidated Financial Statements – 3.7 Financial risk management (pages 87 to 108)

#### **Key Audit Matter**

The Group reports goodwill totalling CHF 829.6 million as of 31 August 2021, arising from past business combinations.

Management has to assess goodwill for impairment on a yearly basis using a discounted cash flow model to determine the value in use of goodwill balances. This requires the use of a number of key assumptions and judgments, including the estimated future cash flows, long-term growth rates, profitability levels and discount rates applied.

Furthermore, in case of business combinations occurring during the reporting period, management applies judgement in allocating the goodwill to the appropriate cash-generating units (CGUs).

We focused on this area in light of the amounts involved and the level of judgement and estimation required.

#### **Our response**

Our audit procedures included, amongst others, evaluating the methodical and mathematical accuracy of the model used for the impairment testing, the appropriateness of the assumptions, and the methodology used by management to prepare its cash flow forecasts. We involved our own valuation specialists to support our procedures.

In particular, we performed the following:

- Gaining an understanding and assessing the reasonableness of business plans by comparing the assumptions to prior year;
- Comparing business plan data against budgets and the mid-term plan as approved by the Board of Directors;
- Recalculating independently the value in use;
- Challenging the robustness of the key assumptions used to determine the value in use, cash flow forecasts, long-term growth rates and the discount rates based on our understanding of the commercial prospects of the related CGUs and by comparing them with publicly available data, where possible;
- Conducting sensitivity analysis, taking into account the Group's historical forecasting accuracy; and
- Comparing the sum of net asset value to the market capitalisation of the Group.

We also considered the appropriateness of disclosures in the consolidated financial statements.

For further information on Goodwill refer to the following:

Notes to the Consolidated Financial Statements – 2.3 Intangible assets (pages 71 to 74)

#### Other Information in the Annual Report

The Board of Directors is responsible for the other information in the annual report. The other information comprises all information included in the annual report, but does not include the consolidated financial statements, the stand-alone financial statements of the company, the remuneration report and our auditor's reports thereon.

Our opinion on the consolidated financial statements does not cover the other information in the annual report and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information in the annual report and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibility of the Board of Directors for the Consolidated Financial Statements

The Board of Directors is responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRS and the provisions of Swiss law, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

#### Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law, ISAs and Swiss Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Swiss law, ISAs and Swiss Auditing Standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business
  activities within the Group to express an opinion on the consolidated financial statements. We are
  responsible for the direction, supervision and performance of the Group audit. We remain solely responsible
  for our audit opinion.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors or its relevant committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report, unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### **Report on Other Legal and Regulatory Requirements**

In accordance with article 728a para. 1 item 3 CO and the Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of consolidated financial statements according to the instructions of the Board of Directors.

We recommend that the consolidated financial statements submitted to you be approved.

## Notes to the Financial Statements

#### **1**Principles

#### 1.1 General aspects

These financial statements have been prepared in accordance with the provisions of the Law on Accounting and Financial Reporting (32<sup>nd</sup> title of the Swiss Code of Obligations). Where not prescribed by law, the significant accounting and valuation principles applied are described below.

Due to rounding, the figures presented in the tables may not add up precisely.

#### 1.2 Investments

Investments are stated at historical costs less any allowance for impairment.

#### 1.3 Treasury shares

Treasury shares are recognized at acquisition cost and deducted from shareholders' equity at the date of acquisition. In case of a resale of treasury shares, the gain or loss is recognized through the income statement as other finance income or finance expense.

#### 1.4 Share-based payments

Should treasury shares be used for share-based payment programs for Board members and employees, the difference between the original acquisition costs and any consideration paid by the employees at grant date is recognized as personnel expenses.

#### 1.5 Short-term interest-bearing loans

Short-term interest-bearing loans are recognized on the balance sheet at nominal value.

#### 1.6 Long-term interest-bearing loans

Long-term interest-bearing loans are recognized on the balance sheet at nominal value.

#### 1.7 Revenue recognition for management fees and licence income

Management fees and license income are recorded as revenue when realized.

#### 1.8 Foregoing a cash flow statement and additional disclosures in the notes

As Barry Callebaut AG has prepared its Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS), the Company elected to forego presenting additional information on interest-bearing loans and audit fees in the notes as well as a cash flow statement in accordance with the law.

#### 2 Information on balance sheet and income statement items

#### 2.1 Prepaid expenses and accrued income

Short-term prepaid expenses and accrued income mainly consist of prepayments for future events, annual subscriptions and annual contributions for social securities.

#### 2.2 Investments

Balance carryforward	1,268,345

1 Resolution of the General Meeting of Shareholders as of December 9, 2020; payment excludes dividends on treasury shares.

2 The total dividend amount is calculated based on all outstanding registered shares (while payment of dividend for treasury shares held by the Group on payment date will be excluded).

The Board of Directors proposes to the 2021 Annual General Meeting a dividend of CHF 28.00 per share.

The dividend is expected to be paid on or around January 6, 2022.

# Statutory Auditor's Report

To the General Meeting of Barry Callebaut AG, Zurich

## **Report on the Audit of the Financial Statements**

#### Opinion

We have audited the financial statements of Barry Callebaut AG, which comprise the balance sheet as at 31 August 2021, and the income statement for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion the accopanying financial statements for the year ended 31 August 2021 comply with Swiss law and the company's articles of incorporation.

#### **Basis for Opinion**

We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Our responsibilities under those provisions and standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the entity in accordance with the provisions of Swiss law and the requirements of the Swiss audit profession and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Report on Key Audit Matters based on the circular 1/2015 of the Federal Audit Oversight Authority

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. We have determined that there are no key audit matters to communicate in our report.

#### Responsibility of the Board of Directors for the Financial Statements

The Board of Directors is responsible for the preparation of the financial statements in accordance with the provisions of Swiss law and the company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the entity's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the entity or to cease operations, or has no realistic alternative but to do so.

#### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Swiss law and Swiss Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Swiss law and Swiss Auditing Standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the entity to cease to continue as a going concern.

We communicate with the Board of Directors or its relevant committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board of Directors or its relevant committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Board of Directors or its relevant committee, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report, unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## **Report on Other Legal and Regulatory Requirements**

In accordance with article 728a para. 1 item 3 CO and the Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of financial statements according to the instructions of the Board of Directors.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the company's articles of incorporation. We recommend that the financial statements submitted to you be approved.
